| Sheets and Plates, Coating with Tin, &c. (P) Morewood. (v, 1886).....                                                   | 241      |
| Sheets, Apparatus for Coating, with Metals or Alloys. (P) Heathfield. (ix, 1890).....                                   | 396      |
| Sheets for Galvanising, Preparation of. (P) Davies Bros. and Co. and others. (xiv, 1895).....                           | 973      |
| Sheets, Prod. of, by Electricity. (P) Reynolds. (vii, 1888).....                                                        | 634      |
| Solubility of Type. (Schutze). (vii, 1888).....                                                                         | 217      |
| Strips, App. for Galvanising. (P) Vibart. (ix, 1890).....                                                               | 949      |
| Structures, Experiments on Rasting of. (T.R.) (xiv, 1895).....                                                          | 701      |
| Trade of the United Kingdom. (T.R.) (xiv, 1895).....                                                                    | 86       |
| Treatment of White, in Basic Furnace. (Giehrst). (x, 1891).....                                                         | 6        |
| Varnishing, in Light-resisting Colours. (P) Perl and Hermann. (xii, 1894).....                                          | 1072     |
| Wires, Sheets, &c., Alloying surfaces of. (P) Martin. (xi, 1892).....                                                   | 924      |
| Wood, &c., Varnish for Coating. (P) Crane. From Hale. (vii, 1888).....                                                  | 330      |
| -Work, Use of Alloys in. (Roberts-Austen). (ix, 1890).....                                                              | 740      |
| Zincing, Process and Appliances for. (P) Koller and Breden. (viii, 1889).....                                           | 400      |
| Metals, Acid Phosphates of the Alkali. (Amat.). (vii, 1888).....                                                        | 501      |
| Action of Caustic Soda on. (Veator.). (v, 1886).....                                                                    | 381      |
| Action of Concentrated Acids on certain. (Burch and Dodgson). (xiii, 1894).....                                         | 525      |
| Action of Fatty Oils on. (Donath). (xiv, 1895).....                                                                     | 283      |
| Action of Gases and Vapours on the Noble. (Neumann). (xii, 1893).....                                                   | 294      |
| Action of HCl and Oxygen on the Platinum. (Dudley). (xiii, 1894).....                                                   | 255      |
| Action of Meat Extracts on. (Balland). (x, 1891).....                                                                   | 379      |
| Action of Milk of Lime on. (Schmelzer). (v, 1886).....                                                                  | 493      |
| Action of Mineral Oils on. (Aismann). (xiv, 1895).....                                                                  | 811      |
| Action of Nitric Oxide on. (Emich). (xiv, 1895).....                                                                    | 35       |
| Action of Oils on. (Redwood). (v, 1886).....                                                                            | 362      |
| Action of, on Acid Solutions of their Chlorides. (Ditte and Metzner). (xii, 1894).....                                  | 43       |
| Action of, on India-Rubber. (Thomson and Lewis). (x, 1891).....                                                         | 712      |
| Action of, on Nitric Acid:                                                                                              |          |
| (Fryer and Higley). (xii, 1893).....                                                                                    | 601      |
| (Higley). (xiv, 1895).....                                                                                              | 661      |
| Action of, on Oils. (Livache). (ii, 1883).....                                                                          | 319      |
| Action of, on Salts Dissolved in Organic Liquids. (Varet). (xi, 1892).....                                              | 713, 779 |
| Action of, on Sulphuric Acid. (Ditte). (ix, 1890).....                                                                  | 547      |
| Action of Salt Solutions of. (xi, 1892).....                                                                            | 802      |
| Action of Sulphurous Acid on. (Thl.). (ix, 1890).....                                                                   | 970      |
| Addition Carbon to Liquid. (P) Colley. (xi, 1892).....                                                                  | 1013     |
| Adhesion of, to Glass. (Margot). (xiv, 1895).....                                                                       | 753      |
| Agents for Reducing. (Keller). (xiv, 1895).....                                                                         | 159      |
| Alkali, Treatment of, at High Temperature. (P) Faure. (ii, 1883).....                                                   | 476      |
| Allotropic Transformations of. (le Chatelier). (x, 1891).....                                                           | 773      |
| Aluminium for Reheating certain. (xiii, 1894).....                                                                      | 955      |
| And Alloys, Curious Properties of. (Roberts-Austen). (viii, 1889).....                                                  | 52       |
| And Alloys, Manufacture of. (P) Lewthwaite. (iv, 1885).....                                                             | 286      |
| And Alloys, Purification of. (P) Torres. (xii, 1893).....                                                               | 845      |
| And Minerals of the United Kingdom. (T.R.) (vii, 1889).....                                                             | 841      |
| And Nitric Acid, Chemical Changes between. (Velej). (x, 1891).....                                                      | 204      |
| And Ores, App. for Separating. (P) Ferraris. (x, 1891).....                                                             | 555      |
| And Ores, Smelting. (P) Smyth. (iii, 1884).....                                                                         | 640      |
| And Sulphur, Electrolytic Decomposition of Compounds of. (P) Abel and Murray. From Siemens and Halske. (xii, 1893)..... | 847      |
| Annealing of. (Faure). (ix, 1890).....                                                                                  | 625      |
| Apparatus for Alloying. (P) Baldwin. (x, 1891).....                                                                     | 776      |
| Apparatus for Amalgamating:                                                                                             |          |
| (P) Evans and Burkell. (xii, 1893).....                                                                                 | 273      |
| (P) Molloy. (vi, 1887).....                                                                                             | 735      |
| Apparatus for Casting, <i>in vacuo</i> . (P) Simpson. (xi, 1892).....                                                   | 823      |
| Apparatus for Coating with Lead, Tin, or other. (P) Taylor. (ix, 1890).....                                             | 740      |
| Apparatus for Coating, with Metals or Alloys. (P) Rogers and Player. (x, 1891).....                                     | 645      |
| Apparatus for Depositing. (P) Pelt. (x, 1891).....                                                                      | 147      |
| Apparatus for Determining Melting Point of Easily Fusible. (Liebermann). (i, 1882).....                                 | 191      |
| Apparatus for Electrical Deposition of:                                                                                 |          |
| (P) Alexander. (xiii, 1894).....                                                                                        | 819      |
| (P) Terrill. (vii, 1888).....                                                                                           | 679      |
| Apparatus for Electrometallurgical Operations. (P) Hoepfner. (x, 1891).....                                             | 839      |
| App. for Electrolytic Estimation of. (Levoir). (viii, 1889).....                                                        | 62       |
| Apparatus for Extraction of:                                                                                            |          |
| (P) Cassel. (iii, 1884).....                                                                                            | 322      |
| (P) Chaster. (x, 1891).....                                                                                             | 260      |
| (P) Consens. (ix, 1890).....                                                                                            | 627      |
| (P) Lake. From Vogelmann. (vii, 1888).....                                                                              | 217      |
| (P) Lebedeff. (x, 1891).....                                                                                            | 838      |
| (P) Thompson. From Brewster. (ix, 1890).....                                                                            | 296      |
| (P) Webb. (xi, 1892).....                                                                                               | 922      |
| Apparatus for Extraction of, by Electricity. (P) Taussig. (xiii, 1894).....                                             | 403      |
| Apparatus for Fusion and Purif. of. (P) Danton. (x, 1891).....                                                          | 551      |
| Apparatus for Hardening and Tempering. (P) Holland. (xii, 1893).....                                                    | 526      |
| Apparatus for Heating, by Liquid or Gaseous Fuel. (P) Rodger. (xi, 1892).....                                           | 733      |

| Apparatus for Manufacture of Alkali, by Electrolysis. (Borchers.) (xiii, 1894).....                | 159  |
| Apparatus for Obtaining, by Electrolysis:                                                          |      |
| (P) Cassel. (v, 1886).....                                                                         | 454  |
| (P) Stouls. (xiii, 1894).....                                                                      | 958  |
| Apparatus for Obtaining Precious from Ores:                                                        |      |
| (P) Dennis and Rose. (ix, 1890).....                                                               | 627  |
| (P) Shill. (ix, 1890).....                                                                         | 959  |
| Apparatus for Separating from Ores:                                                                |      |
| (P) Atkins. (xi, 1892).....                                                                        | 618  |
| (P) Lake. From White. (vi, 1887).....                                                              | 371  |
| (P) Scott. (v, 1886).....                                                                          | 431  |
| Apparatus for Separating from Ores, by Electricity. (P) Atkins. (ix, 1890).....                    | 742  |
| Apparatus for Separation and Amalgamation of. (P) Wise. From Walker. (ix, 1890).....               | 1135 |
| Apparatus for Separation of, from Crushed Ores. (P) Crawford. (ix, 1890).....                      | 396  |
| Apparatus for Treating, by Electricity. (P) Lake. From Colby. (ix, 1890).....                      | 952  |
| Apparatus for Treating Ores to Obtain Precious. (P) Young. (x, 1891).....                          | 260  |
| Apparatus for Withdrawing Molten, from Furnaces. (P) Rylands and Horner. (x, 1891).....            | 36   |
| Appliances for Recovery of, from Ores. (P) Fuller. (xiii, 1894).....                               | 44   |
| As Amalgams, Electrolytic Determination of:                                                        |      |
| (Gibbs.) (xi, 1892).....                                                                           | 517  |
| (Vortmann.) (x, 1891).....                                                                         | 1036 |
| Associated with Lead, Recovery of Precious. (P) Lyte. (vii, 1883).....                             | 155  |
| Behaviour of Hydrogen towards. (Neumann and Streintz.) (xi, 1892).....                             | 247  |
| Behaviour of the Alkali, at High Temperatures. (Dittmar.) (vii, 1888).....                         | 730  |
| Carbonates of Alkali, Production of. (P) Lake. From Kayser, Williams, and Young. (vi, 1887).....   | 730  |
| Casting. (P) Huth. (xiv, 1895).....                                                                | 871  |
| Cleaning, Method and App. for. (P) Vlasto. (vi, 1887).....                                         | 823  |
| Coating Aluminium and Alloys with. (P) Legate. (xiv, 1895).....                                    | 808  |
| Coating of:                                                                                        |      |
| (P) Boulé. From Clark. (viii, 1889).....                                                           | 802  |
| (P) Charneck. (ix, 1890).....                                                                      | 77   |
| (P) Norton. (xi, 1892).....                                                                        | 923  |
| (P) Thompson. From Clamer. (x, 1891).....                                                          | 704  |
| Coating or Cleaning. (P) Heathfield.....(xi, 1892), 443; (xii, 1893).....                          | 526  |
| Coating, with a Metallic Alloy. (P) Thoms and Burgum. (xiv, 1895).....                             | 280  |
| Coating, with Adhesive Colours. (P) Loveland. (xiv, 1895).....                                     | 1045 |
| Coating, with Aluminium. (P) Broadwell. (xiii, 1894).....                                          | 815  |
| Coating, with Cement. (P) Kelner. (x, 1891).....                                                   | 546  |
| Coating, with Tin:                                                                                 |      |
| (P) Bangert. (xiv, 1895).....                                                                      | 582  |
| (P) Barthel and Moller. (vii, 1888).....                                                           | 326  |
| (P) Gutensohn. (v, 1886).....                                                                      | 452  |
| (P) Morewood. (vii, 1888).....                                                                     | 36   |
| Coating, with Tin, Lead, or Terne. (P) Gutensohn. (iv, 1885).....                                  | 225  |
| Coating, with Zinc Galvanically. (P) Lea and Hammond. (vi, 1887).....                              | 664  |
| Coating, without Electricity. (P) De Villiers. (i, 1882).....                                      | 339  |
| Colorations of. (Burghardt.) (x, 1891).....                                                        | 702  |
| Colours and Spectra of Incandescent Vapours of. (Dudley.) (xi, 1892).....                          | 924  |
| Composition for Protecting, from Rust. (P) Thompson. From Sohler and Burger. (xii, 1893).....      | 849  |
| Composition of. (P) Ineb. (xiv, 1895).....                                                         | 278  |
| Compound for Carburising. (P) Brown. (xi, 1892).....                                               | 616  |
| Compound for Preventing Pores in. (P) Burger and Mannheim. (x, 1891).....                          | 775  |
| Compound for Welding, &c. (P) Fisher. From Lord. (viii, 1889).....                                 | 598  |
| Compounds of the Rare, Obtaining. (P) von Welsbach. (v, 1886).....                                 | 522  |
| Compounds of, with Carbon Monoxide. (Wartlia.) (x, 1891).....                                      | 837  |
| Containing Oxygen, Reduction of. (P) Reichwald. From Krupp. (xiv, 1895).....                       | 663  |
| Crystalline State of. (Kalischer.) (ii, 1883).....                                                 | 283  |
| Cyanides of the Alkali, Manufacture of. (P) Murray. From Goerlich and Wichmann. (xiv, 1895).....   | 571  |
| Deoxidising. (P) Jensen. From The Deoxidised Metal Co. (vi, 1887).....                             | 141  |
| Depolarising Electric Baths in Deposition of. (P) Clark. From de Changy. (iii, 1884).....          | 32   |
| Depositing, from their Salts. (P) Beck. From Lévy. (viii, 1889).....                               | 951  |
| Depositing, on Iron and Steel. (P) Lévy. (viii, 1889).....                                         | 957  |
| Deposition of. (P) Cowper-Coles and Walker. (xiii, 1894).....                                      | 1067 |
| Deposition of, by Electrolysis. (P) Classen. (i, 1882).....                                        | 236  |
| Desulphurising certain. (P) Rossignaux. (xi, 1892).....                                            | 615  |
| Detection of, by Electrolysis. (Mayencon.) (vi, 1887).....                                         | 836  |
| Detection of, by Thiocetic Acid. (Schiff.) (xiv, 1895).....                                        | 889  |
| Determination and Separation of, by Double Salts of Pyrophosphoric Acid. (Brand.) (vii, 1889)..... | 1011 |
| Determination of Alkaline Earth, in Solutions. (De la Harpe.) (iv, 1885).....                      | 510  |
| Determination of Iron Group of, by Hydrogen Peroxide. (Carnot.) (viii, 1889).....                  | 138  |
| Determination of the Noble. (Opificius.) (vii, 1888).....                                          | 403  |

## Metals—cont.

PAGE

|                                                                                                |      |
|------------------------------------------------------------------------------------------------|------|
| Direct Production of, from their Ores. (Lebedieff.) (xi, 1892).....                            | 243  |
| Disaggregation of Pyrites for Extraction of. (P) Body. (xiv, 1895).....                        | 973  |
| Dissociation of Alloyed. (P) Romiquieres. (viii, 1889).....                                    | 770  |
| Dissolving and Reducing Agent for, Manufacture of. (P) Bernard. (ix, 1890).....                | 1135 |
| Dry Extraction of. (P) Alzugaray. (ix, 1890).....                                              | 1041 |
| Effect of Annealing on the Properties of. (Le Chatelier.) (ix, 1890).....                      | 625  |
| Effect of Stress on Corrosion of. (Andrews.) (xiii, 1894).....                                 | 1209 |
| Effect of Stress on Electrical Properties of. (Gray and Henderson.) (xiii, 1894).....          | 957  |
| Electric Reduction of. (P) Willson. (xi, 1892).....                                            | 354  |
| Electric Reduction of, and Apparatus therefor. (P) Willson. (x, 1891).....                     | 617  |
| Electro-deposition of:                                                                         |      |
| (P) Bertrand. (xii, 1893).....                                                                 | 162  |
| (P) Heathfield and Rawson. (xiv, 1895).....                                                    | 874  |
| (P) Picard and Tanier. (xii, 1893).....                                                        | 163  |
| (P) Rudholzner. (xiii, 1894).....                                                              | 529  |
| Electro-deposition of Heavy. (P) Thoms and Burgum. (xiv, 1895).....                            | 371  |
| Electro-fusion of. (P) Thwaite and Allen. (xiv, 1895).....                                     | 1049 |
| Electrolysis of. (P) Placet and Bonnet. (xii, 1893).....                                       | 161  |
| Electrolytic Production of. (P) Hoepfner. (viii, 1889), 401; (xi, 1892), 535; (xii, 1894), 744 |      |
| Electrolytic Separation of:                                                                    |      |
| (Freudenberg.) (xii, 1893).....                                                                | 275  |
| (P) Johnson. From Pelatin and Clerici. (xiv, 1895).....                                        | 810  |
| (Sloane.) (x, 1891).....                                                                       | 727  |
| (Smith and Spencer.) (xiv, 1895).....                                                          | 190  |
| (Smith and Wallace.) (xiv, 1895).....                                                          | 929  |
| Electrolytic Treatment of. (P) Watt. (x, 1891).....                                            | 647  |
| Electrolytic Separation and Deposition of. (P) Clark. From Moebius. (iv, 1885).....            | 751  |
| Electro-motive Force for Separation of. (Freudenberg.) (xii, 1893).....                        | 816  |
| Enamel for:                                                                                    |      |
| (iv, 1885).....                                                                                | 596  |
| (P) Gehring. (x, 1891).....                                                                    | 1007 |
| (Petrik.) (x, 1891).....                                                                       | 138  |
| Enamelling. (P) Robinson and Wheatley. (x, 1891).....                                          | 367  |
| Enamelling and Cementing of, Process for. (P) Erichsen. (i, 1882).....                         | 154  |
| Estimation of Arsenic in. (Clark.) (x, 1891).....                                              | 444  |
| Estimation of Free Acid in Solutions of Per-Salts of the Heavy. (Hoffmann.) (xiii, 1894).....  | 282  |
| Estimation of Manganese in, Methods for. (Saniter.) (xii, 1894).....                           | 112  |
| Extracting, by Amalgamation. (P) Fischer and Weber. (iv, 1885).....                            | 351  |
| Extracting, from Ironstone. (P) Miles. (iv, 1885).....                                         | 224  |
| Extracting Precious, from their Ores:                                                          |      |
| (P) Abel. From Fischer and Weber. (vi, 1887).....                                              | 512  |
| (P) Crawford. (xiv, 1895).....                                                                 | 871  |

| (P) Hood. (xiv, 1895).....                                                                     | 808  |
| (P) Jensen. From Russell. (vii, 1888).....                                                     | 504  |
| (P) Lebedieff. (x, 1891).....                                                                  | 838  |
| (P) Niewerth. (xi, 1892).....                                                                  | 616  |
| (P) Shears. (viii, 1889).....                                                                  | 990  |
| (P) Turton. (xi, 1892).....                                                                    | 614  |
| Extraction of, from Alkaline Solution, &c. (P) Woods. (viii, 1889).....                        | 989  |
| Extraction of, from Carbon. (P) Scott. (iv, 1885).....                                         | 223  |
| Extraction of, from Complex Ores. (P) Thompson. From Lewis. (iii, 1884).....                   | 261  |
| Extraction of, from Ores:                                                                      |      |
| (P) Bull. (vii, 1888).....                                                                     | 570  |
| (P) Constable and Bingle. (vi, 1887).....                                                      | 512  |
| (P) Dennes and Rose. (ix, 1890).....                                                           | 396  |
| (P) Johnson. From Lebedieff. (xii, 1893).....                                                  | 694  |
| (P) Jordan and Longden. (iii, 1884).....                                                       | 524  |
| (P) Lebedieff. (viii, 1889).....                                                               | 802  |
| (P) Lewis and Phillips. (vii, 1888).....                                                       | 678  |
| (P) Noad, Mums and Stevens. (xi, 1892).....                                                    | 921  |
| (P) Paterson and Starke. (x, 1891).....                                                        | 1010 |
| (P) Perkins. (xiv, 1895).....                                                                  | 370  |
| (P) Shedlock and Denny. (xi, 1892).....                                                        | 695  |
| (P) Sulman and Teed. (xiv, 1895).....                                                          | 870  |
| (P) Thompson. From Bonehill and Gautier. (xiv, 1895).....                                      | 490  |
| Extraction of, from Ores, and Apparatus therefor:                                              |      |
| (P) Jordan. (viii, 1889).....                                                                  | 200  |
| (P) Welford. (ix, 1890).....                                                                   | 810  |
| Extraction of, from Ores, Slags, &c. (P) Fohr. (iii, 1884).....                                | 486  |
| Extraction of, from Oxides and Sulphides. (P) Vautin. (xiv, 1895).....                         | 582  |
| Extraction of, from their Chlorides or Fluorides. (P) Groth. From Gratzel. (iv, 1885).....     | 223  |

|                                                                                                                      |          |
|----------------------------------------------------------------------------------------------------------------------|----------|
| Extraction of Precious, from Copper, and Apparatus therefor. (P) Haeger and The Cape Copper Company. (ix, 1890)..... | 1134     |
| Extraction of Precious, from Sea-water. (Munster.) (xi, 1892).....                                                   | 351      |
| Extraction, Separation, and Refining of, by Electrolysis. (P) Tommasi. (xii, 1893).....                              | 768, 768 |
| Flux for Soldering. (P) Thompson. From Nicolai. (xiii, 1894).....                                                    | 890      |
| Fluxing Material for Treating. (P) Craven. (ix, 1890)....                                                            | 77       |
| For Ceramic Colours, Application of Rare. (xi, 1892).....                                                            | 523      |
| From Metal-bearing Bodies, Recovery of. (P) Loe. (xi, 1892).....                                                     | 351      |
| From Mixed Ores, Extraction of. (P) Cross and Wells. (iii, 1884).....                                                | 111      |
| From Nitrates, Production of. (P) Darling and Forrest. (xiii, 1894).....                                             | 647      |
| From Ores in the United Kingdom for 1888-89, Production of. (T.R.) (ix, 1890).....                                   | 751      |
| From Ores, Obtaining of:                                                                                             |          |
| (P) Nicholas. (vi, 1887).....                                                                                        | 823      |
| (P) Russell. (iii, 1884).....                                                                                        | 115      |
| From Ores, Production of. (P) MacArthur, Forrest, and Morton. (vi, 1887).....                                        | 600      |
| From Ores, Recovery of. (P) Campion and Tenison-Woods. (x, 1891).....                                                | 838      |
| From Refractory Ores. (P) Hall. (xiii, 1894).....                                                                    | 741      |
| From their Ores, Production of. (P) Berner. (xiii, 1894).....                                                        | 889      |
| From their Ores, Recovering. (P) Sulman. (xiv, 1895)....                                                             | 870      |
| From their Ores, Recovery of Precious. (P) Moldenhauer. (xii, 1893).....                                             | 48       |
| From their Ores, Reduction of:                                                                                       |          |
| (P) Clark. (ii, 1883).....                                                                                           | 479      |
| (Hartley.) (x, 1891).....                                                                                            | 467      |
| Furnace for Reducing. (P) Nawrocki. From Quaglio, Pintsch, and Lentz. (iii, 1884).....                               | 639      |
| Furnace for Smelting or Fusing. (P) Quaglio, Pintsch, and Lentz. (iv, 1885).....                                     | 503      |
| Furnaces for Heating or Melting. (P) Butler. (xii, 1893).....                                                        | 450      |
| Furnaces for Treating. (P) Swain. (ii, 1883).....                                                                    | 383      |
| Galvanising of, and Apparatus therefor. (P) Midgley and Nye. (viii, 1889).....                                       | 713      |
| Gilding. (P) Dodé. (i, 1882).....                                                                                    | 192      |
| Glazing and Enamelling. (P) Ahern. (xiv, 1895).....                                                                  | 659      |
| In Alkaline Solution, Separation and Estimation of. Jannasch and Lesinsky. (xiii, 1894).....                         | 548      |
| In Australia. (T.R.) (xii, 1893).....                                                                                | 175      |
| In Commercial Copper, Determination of Foreign. (Hampe.) (xiii, 1894).....                                           | 421      |
| In Drinking Water, Detection of. (Cooper.) (v, 1886)....                                                             | 84       |
| In Fatty Oils, Detection and Estimation of. (Fresenius and Schottenfroh.) (xiv, 1895).....                           | 895      |
| In Prussia in 1887, Production of. (T.R.) (vii, 1888)....                                                            | 651      |
| In Pulverulent Form, Production of. (P) Abel. From Elektrizitäts-Gesellschaft Gelnhausen. (xiv, 1895)....            | 369      |
| In Russia. (T.R.) (ix, 1890).....                                                                                    | 356      |
| In Russia, Production of. (T.R.) (viii, 1889).....                                                                   | 225      |
| In Sweden for 1888, Production of. (T.R.) (ix, 1890).....                                                            | 339      |
| Influence of, on Mixture of Acetylene and Air. (Bellamy.) (iv, 1885).....                                            | 668      |
| Influence of Temperature on Tensile Strength of. (Rudeloff.) (xiii, 1894).....                                       | 520      |
| Interference of, in Assay of Gold Ores. (Buchanan.) (xiv, 1895).....                                                 | 1064     |
| Klein's Method of Shaping Electro-deposited. (Langbein.) (xiii, 1894).....                                           | 1205     |
| Leading, Process for. (P) Mohlau and Schirakenberg. (i, 1882).....                                                   | 458      |
| Liquid Polish for Cleaning. (P) King. (xi, 1892).....                                                                | 620      |
| Manufacture of, and Apparatus therefor. (P) Johnson. From Imbert and Julien. (x, 1891).....                          | 335      |
| Manufacture of, by Electrolysis. (P) Jensen. (v, 1886)....                                                           | 331      |
| Melting, by Electricity. (P) Krönsen. (xi, 1892).....                                                                | 1016     |
| Minerals, &c., Report on. (T.R.) (ix, 1890).....                                                                     | 1079     |
| Molten, Treating. (P) Uehling. (xiv, 1895).....                                                                      | 872      |
| Obtaining, by Electricity. (P) Thompson. From Cowles. (iv, 1885).....                                                | 679      |
| Obtaining, by Electrolysis:                                                                                          |          |
| (P) Elmore. (vi, 1887).....                                                                                          | 833      |
| (P) Wise. From Frei. (xii, 1893).....                                                                                | 689      |
| Obtaining, from their Solutions. (P) Sulman. (xiv, 1895)....                                                         | 870      |
| Of Alkalis or Alkali Earths, Alloys of. (P) Hulin. (xiv, 1895).....                                                  | 1019     |
| Of Hydrogen Sulphide Group, Quantitative Separation of. (Jannasch and Etz.) (xi, 1892).....                          | 710      |
| Of the Alkaline Earths, Manufacture of, and Apparatus therefor. (P) Lake. From Netto. (viii, 1889).....              | 122      |
| Of the Alkalis, App. for Obtaining. (P) Grabau. (ix, 1890)....                                                       | 1041     |
| Of the Earths and Alkaline Earths, Production of. (P) Feldmann. (viii, 1889).....                                    | 465      |
| Of the Platinum Group, Ligation of. (Matthey.) (xii, 1893).....                                                      | 418      |
| Of the Second Group, Electrolytic Separation of. (Schmucker.) (xiii, 1894).....                                      | 280      |
| Or Alloys, Removal of Gases from. (P) Selwyns. (ix, 1890).....                                                       | 711      |
| Oxidation of the Alkali. (Holt and Sims.) (xiii, 1894)....                                                           | 526      |
| Oxides of Alkali, Mannf. of. (P) Castner. (xi, 1892).....                                                            | 1005     |

## Metals—cont.

## PAGE

|                                                                                                         |      |
|---------------------------------------------------------------------------------------------------------|------|
| Oxidising Action of Ammonia Solution on. (Hodgkinson and Bellairs.) (xiv, 1895).....                    | 160  |
| Oxygen in. (Lederbur.) (iv, 1885).....                                                                  | 677  |
| Paints for Protecting:                                                                                  |      |
| (P) Riegelmann. (i, 1882).....                                                                          | 449  |
| (P) Wells. (ii, 1883).....                                                                              | 287  |
| Pickling of. (P) Smith. (xiii, 1894).....                                                               | 626  |
| Plates, &c., of Combined, Manufacture of. (P) Abel. From Glaser. (xii, 1893).....                       | 451  |
| Plating, with Aluminium. (P) Brin. (viii, 1889).....                                                    | 548  |
| Polishing Powder for. (P) Storer. (ix, 1890).....                                                       | 84   |
| Polysulphides of the Alkali. (Böttger.) (iii, 1884).....                                                | 444  |
| Pot for Melting. (P) Harsant. (iv, 1885).....                                                           | 120  |
| Powder for Hardening. (P) Groth. From Beckstein. (vi, 1887).....                                        | 218  |
| Precipitating and Collecting, from Solutions. (P) Brooks. From Molloy. (xii, 1893).....                 | 362  |
| Precipitating Precious, from Solutions:                                                                 |      |
| (P) MacArthur. (xiv, 1895).....                                                                         | 369  |
| (P) Moldenhauer. (xiii, 1894).....                                                                      | 815  |
| Preparing Surfaces of, for Electro Deposits. (P) Elmore. (viii, 1889).....                              | 603  |
| Production of Alkali. (Castner.) (v, 1886).....                                                         | 801  |
| Production of, by Electricity. (P) Dymond from Laseuyer. (ix, 1890).....                                | 196  |
| Protecting, against Corrosion. (P) Paskin and Aekroyd. (xiv, 1895).....                                 | 757  |
| Purification of:                                                                                        |      |
| (P) Clark. From Edwards. (ii, 1883).....                                                                | 281  |
| (P) Pitt. From Harriet. (i, 1882).....                                                                  | 370  |
| Purification of, in Moulds. (P) Tausig. (xiii, 1894).....                                               | 401  |
| Quantitative Analysis of Heavy. (Neumann.) (xiv, 1895).....                                             | 69   |
| Quantitative Separation of. (Jannasch and Lesinsky.) (xiii, 1894).....                                  | 67   |
| Ratio between Electric and Thermal Conductivities of. (Berget.) (ix, 1890).....                         | 520  |
| Recovery of. (P) Robson and Crowder. (xiv, 1895).....                                                   | 580  |
| Recovery of, from Copper Ore Mother-Liquors. (P) de Cuyper. (ix, 1890).....                             | 860  |
| Reduction of Nitrous Oxide by. (Salaber and Sendrens.) (xiv, 1895).....                                 | 833  |
| Refining, and Apparatus therefor. (P) Allen. (xii, 1893).....                                           | 696  |
| Refining and Separating Precious. (P) Dodé. (ix, 1890).....                                             | 810  |
| Refuse, Treating and Separating. (P) Woods. (vii, 1888).....                                            | 327  |
| Regulating Temperatures in Mannf. of. (P) Crompton. (xii, 1893).....                                    | 694  |
| Relation between Toxic Properties and Chemical Functions of. (Blake.) (i, 1882).....                    | 173  |
| Removal of Impurities in Ingots of Malleable. (P) Iyer. (ii, 1883).....                                 | 416  |
| Removing Tin from. (P) Reinecken and Pönsen. (ii, 1883).....                                            | 281  |
| Rendering, Homogeneous. (P) Fraley. (xi, 1892).....                                                     | 635  |
| Replacement of, by alterable, Solutions in Voltaic Combinations. (Wright and Thompson.) (vi, 1887)..... | 604  |
| Researches in the Reduction of Difficult. (Rogers.) (ix, 1890).....                                     | 519  |
| Roasting Ores for Extracting, and Apparatus therefor. (P) Trivick. (ix, 1890).....                      | 353  |
| Rust-preventive Compositions for. (Reigelmann.) (i, 1882)....                                           | 949  |
| Separating. (P) Mays. (xiii, 1894).....                                                                 | 740  |
| Separating Alkali and Earthy, from Salts. (P) Atkins and Applearth. (xi, 1892).....                     | 43   |
| Separating and Purifying. (P) Mays. (xiii, 1894).....                                                   | 815  |
| Separating, from Ores:                                                                                  |      |
| (P) Besenfelder. (xiii, 1894).....                                                                      | 815  |
| (P) Johnson. From Auel and Thiollier. (ii, 1883)....                                                    | 479  |
| (P) Lake. From Marchese. (ii, 1883).....                                                                | 43   |
| (P) Mays. (iv, 1885).....                                                                               | 352  |
| (P) Parnell. (v, 1886).....                                                                             | 382  |
| (P) Scott. (ii, 1883).....                                                                              | 479  |
| (P) Stanfield and Clarkson. (ix, 1890).....                                                             | 191  |
| Separating, from Ores, and Treatment of. (P) Quentin and Brin. (v, 1886).....                           | 101  |
| Separating, from Slag, &c. (P) Lake. From Peek. (viii, 1889).....                                       | 201  |
| Separating, from their Alloys. (P) Sherlock. (v, 1886)....                                              | 216  |
| Separating Precious, from their Ores, and Apparatus therefor. (P) Tripler. (vii, 1888).....             | 326  |
| Separating the Precious, from Lead:                                                                     |      |
| (P) Greenway. (vi, 1887).....                                                                           | 43   |
| (P) Rosing. (xi, 1892).....                                                                             | 694  |
| (P) Russell. (iv, 1885).....                                                                            | 122  |
| Separation and Refining of, and Apparatus therefor. (P) Lake. From Hayden. (vii, 1888).....             | 390  |
| Separation of Arsenic, Tin, &c., from other. (Jannasch.) (xiv, 1895).....                               | 510  |
| Separation of, by Electrolysis. (P) Oliver. (xiv, 1895)....                                             | 281  |
| Separation of, by Hydrogen Peroxide. (Jannasch and Rottgen.) (xiv, 1895).....                           | 598  |
| Separation of, by Hydrogen Peroxide. (Jannasch and Rose.) (xiii, 1894).....                             | 1224 |
| Separation of, by Magnetism. (P) Maxim. (vi, 1887)....                                                  | 575  |
| Separation of, from Blendes. (P) Roux and Desmazures. (xiv, 1895).....                                  | 369  |
| Separation of, from Scmps. &c. (P) Fursue, Moisset, and Very. (xiii, 1894).....                         | 400  |

|                                                                                                             | PAGE     |
|-------------------------------------------------------------------------------------------------------------|----------|
| <b>Metals—cont.</b>                                                                                         |          |
| Separation of, from their Dilute Solutions. (Mylus and Fromm.) (xii, 1894).....                             | 527      |
| Separation of, in Alkaline Solution. (Jannasch and Kammerer.) (xiv, 1895).....                              | 880      |
| Separation of, Method and Apparatus for. (P) Meubius. (xiv, 1895).....                                      | 371      |
| Separation of Precious, from Ores. (P) Contarini. (vii, 1888).....                                          | 570      |
| Separation of, Precipitated by Sulphuretted Hydrogen. (Antoni and Niccoli.) (xii, 1893).....                | 866      |
| Separation of Zinc from the Group. (Hampe.) (iv, 1885).....                                                 | 419      |
| Separators for Extracting, from Slag. (P) Askham and Wilson. (x, 1891).....                                 | 706      |
| Smelting of Sulphurets or Sulphides of. (P) Prince. From Dixon and others. (xii, 1893).....                 | 1041     |
| Sodium Pyrophosphate for Estimation and Separation of. (Vortmann.) (vii, 1888).....                         | 401      |
| Solder for Soldering. (P) Nicholai. (xiii, 1894).....                                                       | 645      |
| Soldering Aluminium Plates to other. (P) Thompson. From Laud. (x, 1891).....                                | 262      |
| Soldering, New Method of. (Novel.) (xii, 1893).....                                                         | 841      |
| Solubility of Salts of the Heavy, in Sugar Solution. (Stern and Frankel.) (xii, 1893).....                  | 1067     |
| Solution for Coating, with Lead. (P) Clark. From Morgan. (x, 1891).....                                     | 704      |
| Solutions for Colouring. (Pensky.) (vii, 1888).....                                                         | 753      |
| Sulphates of, from Oxides, Obtaining. (P) Graham. (vi, 1887).....                                           | 217      |
| Sulphides and Oxides of, Treating. (P) Knowles. (iv, 1885).....                                             | 223      |
| Surfacing. (P) Thompson. From Kiesel. (xiii, 1894).....                                                     | 42       |
| Sweep-smelting of. (Bettel.) (xiii, 1894).....                                                              | 953      |
| Tempering and Hardening. (P) Durning. (xi, 1892).....                                                       | 1014     |
| The Platinum. (viii, 1889).....                                                                             | 710      |
| Treatment of. (P) Clark. From Clemand. (i, 1882).....                                                       | 410      |
| Treatment of Compound Ores containing. (P) Milis. From Manhes. (iv, 1885).....                              | 120      |
| Treatment of finely-divided Ore containing Precious. (P) Raleigh. (xii, 1894).....                          | 401      |
| Treatment of Lead for Coating. (P) Justice. From Chamer. (iii, 1884).....                                   | 180      |
| Treatment of Ores for Extraction of. (P) Sulman. (xiv, 1895).....                                           | 369      |
| Use of Aluminium for Refining:                                                                              |          |
| (T.R.) (xiv, 1895).....                                                                                     | 208      |
| (Faucan.) (xiv, 1895).....                                                                                  | 276      |
| Vessels for Electrolytic Separation of. (P) Newbury. From Horing and Barchers. (xiv, 1895).....             | 975      |
| Vessels for Galvanising, Tinning, or Coating. (P) Lather. (v, 1886).....                                    | 101      |
| Waterproof Coating for. (P) Fridman. (ix, 1890).....                                                        | 745      |
| Welding, Soldering, and Brazing of, and Apparatus therefor. (P) Lake. From Thomson. (viii, 1889).....       | 802      |
| Which can be determined by Electrolysis. (Kohn and Woodgate.) (viii, 1889).....                             | 257      |
| Working and Welding of, by Electricity. (P) Longsdon. From Krupp. (xii, 1893).....                          | 847      |
| Working of, by Electricity. (P) Renardos and Olszewski. (v, 1886).....                                      | 675      |
| World's Production of Noble. (T.R.) (xiii, 1894).....                                                       | 676      |
| <b>Metallic Compounds, Electric Smelting of Refractory. (P) Wilson. (xii, 1893).....</b>                    | 933      |
| Compounds, Manufacture of. (P) Radford. (iv, 1885).....                                                     | 351      |
| Deposits, Method of Producing. (Gottig.) (xiii, 1894).....                                                  | 1200     |
| Deposits, Production of Easily Separable. (P) Netto and others. (xii, 1893).....                            | 768      |
| Etching for Producing Designs in Relief and Colours. (P) Piper. (v, 1886).....                              | 102      |
| Powders, Manufacture of Coated. (P) Inray. From Sachs. (xiii, 1894).....                                    | 893, 958 |
| Reducing Agents. (Keller.) (xiv, 1895).....                                                                 | 274      |
| Residues, Recovering Tin from. (P) Reinecken. (iv, 1885).....                                               | 406      |
| Substances, App. for Separating. (P) Peck. (x, 1891).....                                                   | 451, 451 |
| Substances, App. for Treating. (P) Peck. (x, 1891).....                                                     | 775      |
| Surfaces, Coating with Metals or Alloys. (P) Stuart and Binney. (vi, 1887).....                             | 823      |
| Surfaces, Electro-nickelling of. (xiii, 1894).....                                                          | 1204     |
| Surfaces, Plating. (P) Marino. (xiii, 1894).....                                                            | 958      |
| Surfaces, Producing Designs on. (P) Haddan. From von Chelunicki. (vi, 1887).....                            | 517      |
| <b>Metallisation, Prep. of Org. Mat. for. (P) Boul. (vi, 1887) ..</b>                                       | 223      |

| And Oil in Linseed Cakes. (Aitken.) (xiii, 1894)                                                                   | 669      |
| And Volatile Bodies, Extracting from Substances. (P) Hagemann. (viii, 1889)                                        | 568      |
| Apparatus for Absorbing. (P) Kemp. (x, 1891)                                                                       | 127      |
| App. for Determining, in Steam. (P) Barras. (ix, 1890)                                                             | 168      |
| In Materials for Paper Manuf. (Lepsius.) (iv, 1885)                                                                | 751      |
| In Paper Pulp. (Griffin.) (ix, 1890)                                                                               | 453      |
| In Paper Pulps. (Readman and Gemmell.) (xii, 1893)                                                                 | 1005     |
| In Raw Sugars, Estimation of. (Scyllart.) (xii, 1893)                                                              | 851      |
| In Superphosphates. (Raffle.) (vi, 1887)                                                                           | 327, 403 |
| In Textiles and in the Atmosphere, Relation between. (Müller.) (i, 1882)                                           | 356      |
| In Walls, Method of Determining. (xii, 1893)                                                                       | 616      |
| In Wood Pulps, Estimation of. (Bell.) (xiii, 1894)                                                                 | 117      |
| Influence of, in Promoting Chemical Action. (Baker.) (xii, 1893), 553; (xiii, 1894)                                | 767      |
| Influence of, on Sizing of Paper. (Hasselkuss.) (xi, 1892)                                                         | 452      |
| Resistance of Oils and Resins to. (Laurie.) (ix, 1890)                                                             | 583      |
| Molasses. (i, 1882)                                                                                                | 330      |
| Alcohols obtained from, Purification of. (P) Salzer. (i, 1882)                                                     | 197      |
| Ammonia, Oxalic Acid, &c., from, Production of. (P) Mayer. (viii, 1889)                                            | 128      |
| Amount of Salts in. (Léplay.) (vii, 1888)                                                                          | 334      |
| Analysis of. (Wiley and others.) (xi, 1892)                                                                        | 761      |
| Analysis of Vinasse from Beet. (Heyer.) (x, 1891)                                                                  | 861      |
| And Grains, Production of Yeast by Fermentation of. (P) Claudon and Vigreux. (iii, 1884)                           | 114      |
| And Potato Pulp for Cattle Food. (Delbrück.) (xiii, 1894)                                                          | 965      |
| As a Foodstuff. (Klix.) (vii, 1888)                                                                                | 130      |
| Augmentation of Fermentable Capacity of. (Greger.) (xiii, 1894)                                                    | 268      |
| Commercial Value of, Estimation of. (Aulard.) (xiv, 1895)                                                          | 46       |
| Composition of Ash of Hungarian. (Szilagy.) (xii, 1893)                                                            | 457      |
| Crystallisable Sugar from, Preparation of. (P) (ii, 1883)                                                          | 185      |
| Crystallised Sugar in, Estimation of, by Karez's Method. (Strohmer and Stift.) (xiv, 1895)                         | 601      |
| Desaccharification of. (P) Abel. From Schwengers Schme. (vi, 1887)                                                 | 375      |
| Extraction of Raffinose from. (Lindet.) (ix, 1890)                                                                 | 637, 815 |
| Extraction of Saltpetre from Salts from Sugar-Beet. (vi, 1887)                                                     | 669      |
| Extraction of Sugar from. (iv, 1885)                                                                               | 355      |
| (P) Daix and Possoz. (iv, 1885)                                                                                    | 357      |
| (Degner.) (iii, 1884)                                                                                              | 323      |
| (P) Le Franc. (v, 1886)                                                                                            | 330      |
| (P) Johnson. From Borin and Loiseau. (iii, 1884)                                                                   | 188      |
| (Juncemann.) (iv, 1885)                                                                                            | 461      |
| (Le Franc.) (vii, 1888)                                                                                            | 334      |
| Fermentation of. (Elfront.) (xiii, 1894)                                                                           | 533, 821 |
| For Spirit Manufacture, Imports into France of. (T.R.) (xiv, 1885)                                                 | 779      |
| Formation of. (Herzfeld.) (xi, 1892)                                                                               | 542      |
| Influence of Invert Sugar on. (Prinsen Geerligs.) (xiv, 1895)                                                      | 607      |
| Lactic Acid from. (Heythien and others.) (ix, 1890)                                                                | 311      |
| Manurial Value of the Vinasse from. (Maerker.) (xii, 1893)                                                         | 852      |
| Melchrose or Raffinose from. (v, 1886)                                                                             | 386      |
| Occurrence of Leucine and Tyrosine in Beetroot. (von Lippmann.) (iv, 1885)                                         | 411      |
| Purification of:                                                                                                   |          |
| (Bureau.) (vi, 1887)                                                                                               | 143      |
| (P) Gundermann. (i, 1882)                                                                                          | 513      |
| (P) Leuchtenbeyer and Moske. (vii, 1888)                                                                           | 379      |
| Purification of, by Soluble Glass. (P) Schott. (iii, 1884)                                                         | 114      |
| Purity of Sugar Products Recovered from. (Delfour.) (xiv, 1895)                                                    | 497      |
| Raffinose Derived from. (Tollens.) (iv, 1885)                                                                      | 290      |

## Molasses—cont.

PAGE

|                                                                                                                                 |          |
|---------------------------------------------------------------------------------------------------------------------------------|----------|
| Raffinose from. (Rischbiet and Tollens.) (v, 1886) .....                                                                        | 243      |
| Raffinose from Separation of. (Scheibler.) (iv, 1885) .....                                                                     | 607      |
| Recovery of Sugar from. .... (i, 1882), 114; (v, 1886) .....                                                                    | 243      |
| Refining. (P) Schneller and Wisse. (xi, 1892) .....                                                                             | 830      |
| Residues, Apparatus for Carbonising and Distilling. (P) Lederer, Jungbunzlau, and Gintl. (i, 1882) .....                        | 221      |
| Residues, Recovering Ammonia and Charcoal from. (P) Ernst. (i, 1882) .....                                                      | 398      |
| Resistance of, to Fermentation. (Ban.) (xiv, 1895) .....                                                                        | 290      |
| Strontia Residue obtained in Desaccharification of. (Reinhardt.) (xii, 1893) .....                                              | 366      |
| Sugar from Alcoholic Solutions of, Obtaining. (P) Gundermann. (i, 1882) .....                                                   | 241      |
| Sugar from Separation of. (P) Scheibler. (ii, 1883) .....                                                                       | 201      |
| Sugar in, Estimation of. (viii, 1889) .....                                                                                     | 560      |
| Sugar Making according to Le Franc. (Bull.) (vi, 1887) .....                                                                    | 554      |
| Treatment of: .....                                                                                                             |          |
| (P) Duncan. (x, 1891) .....                                                                                                     | 781      |
| (P) Gruenger. (xii, 1893) .....                                                                                                 | 703      |
| Treatment of, by Baryta or Strontia. (P) Luray. From Lepage. (iii, 1884) .....                                                  | 423      |
| Treatment of, with Strontia. (Scheibler.) (i, 1882) .....                                                                       | 195      |
| Use of, in Distilleries. (Aulard.) (xiv, 1895) .....                                                                            | 52       |
| White Sugar from Manufacture of. (P) Hübner. (xiii, 1894) .....                                                                 | 824      |
| Moldova, New Manufacture of Sulphuric Acid from Pyrites at. (Hurtenum.) (v, 1886) .....                                         | 378      |
| Molisch's New Reactions for Sugar. (Lenken.) (vi, 1887) ....                                                                    | 119      |
| Mollendo, Exports from. (T.R.) (vii, 1888) .....                                                                                | 530      |
| Molybdenum Compounds, Reduction of. (Pfordten.) (i, 1882) .....                                                                 | 425      |
| Determination of Phosphoric Acid by Precipitation with. (Meineke.) (iv, 1885) .....                                             | 552      |
| Method for Estimation of Phosphorus. (von Reis.) (v, 1886) .....                                                                | 176      |
| Method of Determining Phosphorus. (Myhlertz.) (xii, 1894) .....                                                                 | 67       |
| Preparation and Properties of Pure Cast. (Moissan.) (xiv, 1895) .....                                                           | 867      |
| Production of. (P) (Sternberg and Deutsch.) (xii, 1893) .....                                                                   | 845      |
| Separation of, from Mercury, Silver, and Cadmium. (Smith and Frankel.) (ix, 1890) .....                                         | 1067     |
| Ternary Alloys of Iron with Chromium, Tungsten and. (De Benneville.) (xiv, 1895) .....                                          | 578      |
| Molybdic Acid and Lead, Volumetric Estimation of. (Schindler.) (vii, 1888) .....                                                | 456      |
| Acid, Colour Reaction for. (Levy.) (vi, 1887) .....                                                                             | 387      |
| Acid, Determination of Phosphoric Acid by. (Grete.) (vii, 1888) .....                                                           | 771      |
| Acid, Estimation of. (Smith and Bradbury.) (x, 1891) .....                                                                      | 1037     |
| Monamines and Diamines, Simultaneous Oxidation of. (Bindschedler.) (ii, 1883) .....                                             | 270      |
| Monazite in North Carolina. (T.R.) (xiv, 1895) .....                                                                            | 405      |
| Sources of. (T.R.) (xiv, 1895) .....                                                                                            | 835      |
| Uses of, in Germany. (T.R.) (xiv, 1895) .....                                                                                   | 610      |
| Mond's Chlorine Process. (Quincke.) (xii, 1893) .....                                                                           | 146      |
| Communication on Origin of Ammonia-Soda Process. (Scheurer-Kestner.) (v, 1886) .....                                            | 322      |
| Process for Preparation of Cyanogen Compounds and Ammonia. (ii, 1883) .....                                                     | 328      |
| Sulphur Recovery Process. (Schaeppi.) (i, 1882) .....                                                                           | 482      |
| Monier System of Building Construction. (x, 1891) .....                                                                         | 931      |
| Moniteur Scientifique, Continuation of. (T.R.) (viii, 1889) .....                                                               | 1021     |
| Monobromo- and Dibromo-para-oxy-benzoic Acid, Production of. (P) Johnson. From von Heyden. (xi, 1892) .....                     | 369      |
| Monobromobrazilin. (Schall and Dralle.) (viii, 1889) .....                                                                      | 700      |

| Manufacture of. (P) Johnson. From The Badische Anilin und Soda Fabrik. (xiv, 1895).....                                                                  | 147, 147 |
| Production of Soluble Derivative of. (P) Johnson. From The Badische Anilin und Soda Fabrik. (vii, 1888).....                                             | 431      |
| Naphthene, Nono-. (Konovalov.) (iv, 1885).....                                                                                                           | 394      |
| Nono-, and its Derivatives. (Konovalov.) (ix, 1890).....                                                                                                 | 925      |
| Naphthenes or Polymethylenes, Recent Investigation of. (Markownikoff.) (ix, 1890).....                                                                   | 730      |
| Place of, in System of Organic Substances. (Markownikoff.) (xii, 1893).....                                                                              | 32       |
| Naphthencarboxylic Acids, Hepta- and Octo-. (Aschan.) (x, 1891).....                                                                                     | 997      |
| Naphthidine, Preparation of. (Reverdin and de la Harpe.) (xii, 1893).....                                                                                | 822      |
| Naphthindulines. (Fischer and Hepp.) (xiv, 1895).....                                                                                                    | 799      |
| Naphthionic Acid, Constitution of. (Witt.) (v, 1886).....                                                                                                | 449      |
| Acid, Nitration of. (Nietzki and Zubelew.) (viii, 1889)....                                                                                              | 386      |
| Naphthohydroquinone, Derivatives of $\beta$ -. Production of. (P) Newton. From The Farbenfabriken vormals F. Bayer and Co. (xiii, 1894).....             | 31       |
| Naphthoic aldehyde, $\beta$ -. (Bamberger and Boekmann.) (vi, 1887).....                                                                                 | 542      |
| Naphthol, Acidimetric Estimation of $\alpha$ - and $\beta$ -. (Küster.) (xiii, 1894).....                                                                | 844      |
| Action of Nitrous Acid on 1- $\alpha$ -Amido-2- $\beta$ -. (Meldola.) (xii, 1893).....                                                                   | 141      |
| Alcyclic $\beta$ -Tetrahydro-, and Secondary Ring Alcohols. (Bamberger and Lotter.) (ix, 1890).....                                                      | 493      |
| $\alpha$ -. (vii, 1888).....                                                                                                                             | 867      |
| $\alpha$ - and $\beta$ -, Discriminating between. (Aymonier.) (xiv, 1895).....                                                                           | 771      |
| $\alpha$ - and $\beta$ -, Manufacture of. (P) Levinstein. (iii, 1884)....                                                                                | 29       |
| $\alpha$ -, Manufacture of, from Amido Compounds. (P) Abel. From Farbenwerke vormals Meister, Lucius und Brüning. (xii, 1893).....                       | 672      |

|                                                                                                                                     |      |
|-------------------------------------------------------------------------------------------------------------------------------------|------|
| Naphthol— <i>cont.</i>                                                                                                              |      |
| $\alpha$ -Mono-Sulpho Acid of $\beta$ -, Separation of. (P) Haddan. From Farbenfabriken vormals Bayer and Co. (iv, 1885).....       | 452  |
| $\alpha$ -Monosulphonic Acid, Colouring Matter from $\beta$ -. (P) Farbenwerke vormals Meister, Lucius und Brüning. (ii, 1883)..... | 243  |
| $\alpha$ - of the Thophen Group. (Biedermann.) (v, 1886).....                                                                       | 449  |
| $\alpha$ - or $\beta$ -, a Test for Acids and Chlorine. (Hager.) (v, 1886).....                                                     | 457  |
| $\alpha$ - or $\beta$ -, and Naphthalene, Tests to Distinguish. (Kenter.) (x, 1891).....                                            | 790  |
| $\alpha$ -Sulphonic Acid, $\alpha$ -. (Witt and Kaufmann.) (xi, 1892) ..                                                            | 155  |
| $\alpha$ -Sulphonic Acid of $\beta$ -. (Claus and Volz.) (v, 1886).....                                                             | 29   |
| $\alpha$ -Tetranitro-. (Merz and Weith.) (i, 1882).....                                                                             | 432  |
| Amido-, Manufacture of Sulpho-Acids of. (P) Wilcox. From The Farbenfabriken vormals F. Bayer and Co. (x, 1891).....                 | 760  |
| And Naphthylamine Sulphonic Acids, Estimation of. (Vauel.) (xii, 1894).....                                                         | 548  |
| Antiseptic Properties of $\alpha$ -. (Maximovitch.) (vii, 1888) ..                                                                  | 450  |
| Antiseptic Value of $\beta$ -. (Bouchard.) (vii, 1888).....                                                                         | 225  |
| Aromatic $\alpha$ -Tetrahydro-. (Bamberger and Bordt.) (ix, 1890).....                                                              | 493  |
| Aromatic Tetrahydro- $\beta$ -. (Bamberger and Kitchelt.) (ix, 1890).....                                                           | 603  |
| Azo Colours from Trisulphonic Acids of $\beta$ -. (P) Farbenwerke vormals Meister, Lucius und Brüning. (ii, 1883).....              | 243  |
| Benzoin $\alpha$ -. A New Indicator. (Zaloziecki.) (ix, 1890) ..                                                                    | 770  |
| Benzoate, $\beta$ -. (Yvon and Berlioz.) (xi, 1892).....                                                                            | 264  |
| $\beta$ -. (viii, 1889).....                                                                                                        | 476  |
| (Fischer.) (vii, 1888).....                                                                                                         | 226  |
| $\beta$ -, and Benzaldehyde, Condensation Product of. (Trzinsky.) (iii, 1884).....                                                  | 246  |
| $\beta$ -, Oxidation of. (Ehrlich.) (viii, 1889).....                                                                               | 456  |
| $\beta$ -, Oxidation of, to Orthoaminocarboxylic Acid. (Ehrlich and Benedikt.) (vii, 1888).....                                     | 671  |
| $\alpha$ -, $\beta$ -Sulphonic Acid. (Claus and Knyrim.) (v, 1886).....                                                             | 28   |
| Carbonic Alkaline Salts, Production of. (P) Kolbe and Rentsch. (iv, 1885).....                                                      | 531  |
| Combining Diazo Compounds with. (P) Clark. From Krügener and Farbfabrik vormals Brönnner. (iv, 1885).....                           | 400  |
| Compounds. (Descsquelle.) (xiii, 1894).....                                                                                         | 835  |
| Condensation Derivatives of $\beta$ -. (Gaess and Elsasser.) (xii, 1893).....                                                       | 749  |
| Derivatives, Action of Nitric Acid on. (Armstrong and Rossiter.) (x, 1891).....                                                     | 693  |
| Derivatives of $\alpha$ -. (Noelting and Grandmougin.) (x, 1891).....                                                               | 756  |
| Derivatives of $\alpha$ - and $\beta$ :-<br>(Friedlander.) (iii, 1884).....                                                         | 163  |
| (Reverdin and de la Harpe.) (xi, 1892).....                                                                                         | 997  |
| Derivatives of Sulphonic Acids of $\beta$ -. (Levinstein.) (ii, 1883).....                                                          | 83   |
| Diazo Derivatives of $\alpha$ -. (Noelting and Grandmougin.) (x, 1891).....                                                         | 756  |
| Dinitro- $\beta$ -, Constitution of. (Loewe.) (ix, 1890).....                                                                       | 1028 |
| -Green, Manufacture of. (P) Gans and Co. (iv, 1885).....                                                                            | 204  |
| Higher Homologues of, Manufacture of. (P) Liebmann. (i, 1882).....                                                                  | 102  |
| Monosulpho-Acid of $\alpha$ -, Production of. (P) Liebmann and Studer. (vii, 1888).....                                             | 431  |
| Monosulphonic Acid of $\beta$ -. (P) Badische Anilin und Soda Fabrik. (ii, 1883).....                                               | 275  |
| Monosulphonic Acid of $\beta$ -, Manufacture of Colouring Matters from. (P) Bayer and Co. (ii, 1883).....                           | 172  |
| Monosulphonic Acid of $\beta$ -, Preparation of Colouring Matters from. (P) Farbenfabriken vormals Bayer and Co. (i, 1882).....     | 224  |
| Nitroso- $\beta$ -, Applic. of, in Analysis. (Khorre.) (vi, 1887).....                                                              | 384  |
| Nitroso- $\beta$ -, Use of, in Quantitative Analysis. (viii, 1889) ..                                                               | 819  |
| (Khorre.) (xii, 1893).....                                                                                                          | 711  |
| (Schleier.) (xi, 1892).....                                                                                                         | 713  |
| Reactions for. (Wolff.) (xiv, 1895).....                                                                                            | 599  |
| Soluble Derivative of $\beta$ -. (Dujardin-Beaumetz and Stackler.) (xii, 1893).....                                                 | 781  |
| Sulphonic Acids of $\alpha$ -, Investigations on. (Conrad and Fischer.) (xii, 1893).....                                            | 749  |
| Thio Derivatives of $\beta$ -. (Schiller-Wechsler.) (xiv, 1895) ..                                                                  | 505  |
| Toilet Soaps containing. (Bohm.) (ii, 1883).....                                                                                    | 182  |
| Naphthols. (McMurtrie.) (xiv, 1895).....                                                                                            | 1074 |
| Introducing Benzene Residue into Nucleus of. (P) Liebmann. (i, 1882).....                                                           | 402  |
| Nitroso-, Compounds of, with Iron and Cobalt. (Hoffmann.) (iv, 1885).....                                                           | 278  |
| Nitroso-, Preparation of. (Henriques and Ilinski.) (iv, 1885).....                                                                  | 338  |
| Preparation of. (P) Actiengesellschaft für Anilinfabrikation. (i, 1882).....                                                        | 226  |
| Naphtholbidiazobenzene, $\alpha$ -. (Krohn.) (viii, 1889).....                                                                      | 116  |
| Naphtholdisulpho Acid, Amido-2:7-. Manufacture of. (P) Abel. From The Actien Gesellschaft für Anilin Fabrikation. (xiii, 1894)..... | 876  |
| Acid, Amido-, Manufacture of. (P) Newton. From The Farbenfabriken vormals Bayer and Co. (xiii, 1894)....                            | 943  |
| Acid, Perchlor-, Production of. (P) Pitt. From Cassella and Co. (xiv, 1895).....                                                    | 32   |
| Acid, Production of. (P) Lake. From Leonhardt. (vii, 1888).....                                                                     | 672  |

| Acid, Action of, on Potassium Bichromate. (Schmidt.) (xii, 1893) .....                                        | 153                                     |
| Acid, Action of, on Silk. (Vignon and Sisley.) (xi, 1892) .....                                               | 430                                     |
| Acid, Action of, on Yellow Phosphorus. (Watson.) (xi, 1892) .....                                             | 227                                     |
| Acid, $\alpha$ - or $\beta$ -Naphthol a Test for. (Hager.) (v, 1886) .....                                    | 457                                     |
| Acid and HCl, Manufacture of Chlorine from. (P) Johnson. From The Verein Chem. Fab. (xiv, 1895) .....         | 483                                     |
| Acid and Lead, Chemical Changes between. (Veley.) (x, 1891) .....                                             | 206                                     |
| Acid and Metals, Chemical Changes between. (Veley.) (x, 1891) .....                                           | 204                                     |
| Acid and Tin, Products of the Interaction of. (Walker.) (xii, 1893) .....                                     | 449                                     |
| Acid, Apparatus for Avoiding Loss of, in Manufacture of Sulphuric Acid. (P) Benker and Lasne. (i, 1882) ..... | 180                                     |

## Nitric Acid—cont.

|                                                                                                                 |                                     |
|-----------------------------------------------------------------------------------------------------------------|-------------------------------------|
| Acid, Apparatus for Condensation of:                                                                            |                                     |
| (P) Edwards. From Guttman and Rohrmann. (xi, 1892) .....                                                        | 349                                 |
| (P) Guttman. (ix, 1890) .....                                                                                   | 862                                 |
| (P) Newton. From Hart. (xiii, 1894) .....                                                                       | 1197                                |
| Acid, Apparatus for Continuous Production of. (Prentice.) (xiii, 1894) .....                                    | 323                                 |
| Acid, Apparatus for Manufacture of Concentrated. (P) Valentiner. (xii, 1893) .....                              | 155                                 |
| Acid Apparatus, Modification of Kreisler's. (Robson.) (xi, 1892) .....                                          | 504                                 |
| Acid, Changes of Colour of. (Marchlewski.) (x, 1891) .....                                                      | 1005                                |
| Acid Chlorine Processes. (Davis.) (ix, 1890) .....                                                              | 389                                 |
| Acid, Condensation of:                                                                                          |                                     |
| (Guttman.) (x, 1891) .....                                                                                      | 638                                 |
| (Hart.) (xiv, 1895) .....                                                                                       | 967                                 |
| Acid, Conditions of Reaction between Copper and. (Veley.) (viii, 1889) .....                                    | 858                                 |
| Acid, Danger of Fire through. (Lechartier.) (v, 1886) .....                                                     | 379                                 |
| Acid, Decomposition of, by Ammonium Sulphate. (Lunge and Abenius.) (xiv, 1895) .....                            | 35                                  |
| Acid, Detection of. (Longi.) .....                                                                              | (iii, 1884), 533; (iv, 1885), 553   |
| Acid, Detection of, in Alkali Salts. (de Koninck.) (vi, 1887) .....                                             | 384                                 |
| Acid, Detection of, in Vinegar. (Soltsien.) (xi, 1892) .....                                                    | 372                                 |
| Acid, Detection of, in Waters and Soils. (Bréal.) (vii, 1888) .....                                             | 590                                 |
| Acid, Determination of. (Willfarth.) (vii, 1888) .....                                                          | 692                                 |
| Acid, Determin. of, as Ammonia. (Reichardt.) (v, 1886) .....                                                    | 617                                 |
| Acid, Determination of, by Ferrous Sulphate. (Bailhache.) (viii, 1889) .....                                    | 820                                 |
| Acid, Determination of, in Drinking Water by Schulze-Tiemann's Method. (Spiegel.) (ix, 1890) .....              | 896                                 |
| Acid, Determin. of Nitrogen in. (Stoklasa.) (xii, 1893) .....                                                   | 711                                 |
| Acid, Direct Production of. (P) Imray. From The Chemische Fabrik Griesheim. (x, 1891) .....                     | 1006                                |
| Acid, Electrolytic Determin. of. (Vortmann.) (ix, 1890) .....                                                   | 1066                                |
| Acid, Estimation of. (Longi.) .....                                                                             | (iii, 1884), 533; (iv, 1885), 368   |
| Acid, Estimation of, and Reduction of Same to Ammonia. (Boyer.) (ix, 1890) .....                                | 897                                 |
| Acid, &c., Apparatus for Distilling and Condensing. (P) Maxfield. From Dieterle and Rohrmann. (xiv, 1895) ..... | 272                                 |
| Acid, Eudiometric Determin. of. (Glaser.) (xii, 1893) .....                                                     | 64                                  |
| Acid Gas, Obtaining Continuous Supply of. (P) Walker. (xiv, 1895) .....                                         | 968                                 |
| Acid, Guttman's Manufacture of. (Andersch.) (x, 1891) .....                                                     | 45                                  |
| Acid in Manganese Ores. (ii, 1883) .....                                                                        | 159                                 |
| Acid in Mercuric Oxide, Detect. of. (Mylins.) (ii, 1883) .....                                                  | 427                                 |
| Acid in Plants, Origin and Alteration of. (Frank.) (vii, 1888) .....                                            | 444                                 |
| Acid in the Higher Plants. (Kreisler.) (vi, 1887) .....                                                         | 552                                 |
| Acid in Wines, Detection of. (Bergmann.) (vii, 1888) .....                                                      | 437                                 |
| Acid, Inflammability of Vegetable Matter by. (Hass.) (iv, 1885) .....                                           | 496                                 |
| Acid, Influence of, on Precipitation of Barium. (Browning.) (xiii, 1894) .....                                  | 176                                 |
| Acid, Influence of Nitrogen Tetroxide on Specific Gravity of. (Lunge and Marchlewski.) (xi, 1892) .....         | 776                                 |
| Acid, Manufacture of. (ix, 1885) .....                                                                          | 582                                 |
| (P) Chatfield. (xi, 1892) .....                                                                                 | 907                                 |
| (P) Garraway .....                                                                                              | (xiii, 1894), 735; (xiv, 1895), 751 |
| (Guttman.) (xii, 1893) .....                                                                                    | 203                                 |
| (Hallwell.) (xiv, 1895) .....                                                                                   | 656                                 |
| (P) Prentice. (xiii, 1894) .....                                                                                | 250, 250                            |
| (P) Taylor. (vii, 1888) .....                                                                                   | 210                                 |
| (P) Vogt. (xii, 1893) .....                                                                                     | 43                                  |
| Acid, Oxidation of Nitrous Acid to. (Carpenter.) (v, 1886) .....                                                | 287                                 |
| Acid, Oxidation of Rhamnose by. (Will and Peters.) (viii, 1889) .....                                           | 718                                 |
| Acid, Paratoluidine Sulphate as a Test for. (Longi.) (iii, 1884) .....                                          | 533, 649                            |
| Acid, Points in the Distillation of. (Hart.) (xiv, 1895) .....                                                  | 967                                 |
| Acid, Preparation of Pure. (P) Edwards. From Guttman and Rohrmann. (xi, 1892) .....                             | 1005                                |
| Acid, Production of. (P) Lunge and Maxwell-Lyte. (xiii, 1894) .....                                             | 734                                 |
| Acid, Production of, from Nitrates. (P) Darling and Forrest. (xiii, 1894) .....                                 | 647                                 |
| Acid, Production of, in United States. (Martyn.) (iv, 1885) .....                                               | 28                                  |
| Acid, Purifying and Decolorising Crude, and Apparatus therefor. (P) Pratt. (v, 1886) .....                      | 31                                  |
| Acid, Quantitative Estimation of. (Wildt and Scheib.) (iii, 1884) .....                                         | 378                                 |
| Acid, Reaction of Carbamides with. (Franchimont.) (vi, 1887) .....                                              | 681                                 |
| Acid, Reducing Action of Coke on. (Lunge.) (iv, 1885) .....                                                     | 31                                  |
| Acid, Reduction of, by Copper and Lead. (Higley.) (xiv, 1895) .....                                             | 661                                 |
| Acid, Relative Passivity of Wrought-Iron and Steel Plates in. (Andrews.) (xi, 1892) .....                       | 610                                 |

| (Wright.) (ii, 1883).....                                                                         | 122                  | Liberation of, during Putrefaction. (Gibson.) (xii, 1893).....                                             | 616  |
| Estimation of Alkyl Groups attached to. (Horzig and Meyer.) (xiv, 1895).....                      | 688                  | Liquefaction of. (Wroblewski and Olszewski.) (ii, 1883).....                                               | 233  |
| Estimation of, by Kjeldahl's Method:                                                              |                      | Loss of, during Fermentation of Farnyrd Manure. (Joulic.) (iv, 1885).....                                  | 460  |
| (Chenel.) (xi, 1892).....                                                                         | 913                  | Loss of, during Nitrification. (Tacke.) (vii, 1889).....                                                   | 907  |
| (Martinet.) (viii, 1889).....                                                                     | 920                  | Loss of, in Duzc. (Muntz and Girard.) (xii, 1893).....                                                     | 565  |
| Estimation of, by Schultz-Thiemann's (Schlosing's) Method. (Cochius and Moeller.) (ix, 1890)..... | 417                  | Loss of, in Manufacturing Bone-Fat. (Bornträger.) (vi, 1887).....                                          | 825  |
| Extraction of, from Air. (P) Chapman. (xii, 1893).....                                            | 708                  | Loss of, in Mixtures of Superphosphates with Nitre. (Gussefeld.) (vi, 1887).....                           | 551  |
| Fixation of. (Fawcitt.) (ix, 1890).....                                                           | 30, 271              | Loss of, in the Decay of Organic Substances. (Krause.) (ix, 1900).....                                     | 955  |
| Fixation of Atmospheric:                                                                          |                      | Manurial Value of Certain Forms of. (Klein.) (vii, 1888).....                                              | 332  |
| (Berthelot.) (vi, 1887), 552; (ix, 1890).....                                                     | 86                   | Manuring Oats and Barley with. (Mareker.) (iv, 1885).....                                                  | 126  |
| (Breuneman.) (ix, 1890).....                                                                      | 864                  | Nitre and Total, Determining. (Boyer.) (xi, 1892).....                                                     | 182  |
| (P) Rogation. (xii, 1893).....                                                                    | 626                  | Nitric, Determination of, by Kjeldahl's Method. (Poerster.) (viii, 1889).....                              | 220  |
| Fixation of, by Arable Soil. (Berthelot.) (v, 1886).....                                          | 103                  | Obtainment. (P) Maltzan and Tralls. (vii, 1888).....                                                       | 844  |
| Fixation of, by Argillaceous Soils. (Berthelot.) (v, 1886).....                                   | 498                  | Obtainment of, from Atmospheric Air. (P) Brin. (ix, 1896).....                                             | 40   |
| Fixation of, by Electricity. (T.R.) (xi, 1891).....                                               | 498                  | Of Air and Hydrogen of Water, Preparation of Ammonia from. (P) Gesellschaft L'Azote. (i, 1882).....        | 150  |
| Fixation of, by Leguminous Plants. (Bréal.) (viii, 1888).....                                     | 758; (ix, 1890)..... | Of Coal, Behaviour of, during Destructive Distillation. (Smith.) (iii, 1884).....                          | 234  |
| Fixation of, Experiments on. (Lawes and Gilbert.) (ix, 1890).....                                 | 633                  | Of Coal, &c., Obtaining Ammonium Chloride from. (Frencl.) (vii, 1888).....                                 | 735  |
| For Manuring Sugar-Beets. (Durrant.) (i, 1882).....                                               | 328, 328             | Of Leguminous Crops, Sources of. (Lawes and Gilbert.) (xi, 1892).....                                      | 253  |
| Formation of Nitrous Acid and Ammonia from Free. (Loew.) (ix, 1890).....                          | 979                  | Of Minerals, Production of Ammonia from. (Bilby.) (iii, 1884).....                                         | 216  |
| -Free Extract of Barley. (Lüntner.) (ix, 1890).....                                               | 1653                 | Of Moors, Production of Ammonium Sulphate from. (P) Wise. From Grouven. (x, 1891).....                     | 45   |
| Gain of, in Soils Destitute of Vegetation. (Tacke.) (viii, 1889).....                             | 907                  | Of Oilworks Sludge, Conversion of, into Ammonia. (Redwood.) (x, 1891).....                                 | 108  |
| Gain or Loss of, by Cultivated and Fallow Soils, Experiments on. (Pagnoul.) (ix, 1890).....       | 875                  | Of Petroleum and Paraffin Oils. (Bilby.) (x, 1891).....                                                    | 120  |
| Gas, Apparatus for Producing, &c. (P) Cryer. (x, 1891).....                                       | 528                  | Of Vegetation, Sources of. (Lawes and Gilbert.) (viii, 1889).....                                          | 405  |
| Gas, Prep. of Cyanides by Aid of. (P) Alder. (ix, 1882).....                                      | 408                  | Organic, Estimation of, by Kjeldahl's Method. (Aubin and Alla.) (viii, 1889).....                          | 574  |
| Green Manures as Suppliers of. (Muntz.) (ix, 1890).....                                           | 875                  | Organic, Estimation of, by Soda Lime and by Kjeldahl's Method. (Hôte.) (vii, 1889).....                    | 574  |
| Gunning's Modification of Kjeldahl's Method of Estimating: (Atterberg.) (ix, 1890).....           | 825                  | Organic, in Water, Estimation of. (Leffmann and Beann.) (viii, 1889).....                                  | 480  |
| (Carrigues.) (xiv, 1895).....                                                                     | 304                  | Organic, Methods of Estimating. (Oddy and Cohen.) (ix, 1890).....                                          | 17   |
| In Ammonium Salts, Estimation of, by the Azotometer. (Hentschel.) (ix, 1890).....                 | 971                  | Oxide, Determination of Oxygen by. (de Koninck.) (x, 1891).....                                            | 485  |
| In Arable Soils, Loss and Gain of. (Dechraim.) (ii, 1883).....                                    | 185                  | Oxides of. (Ramsay and Cundall.) (iv, 1885).....                                                           | 208  |
| In Bone Dust, Value of. (iii, 1884).....                                                          | 185                  | Pentoxide. (Meyer.) (viii, 1889).....                                                                      | 283  |
| In Chili Saltpetre and Ammonium Sulphate, Value of. (Baessler.) (viii, 1889).....                 | 205                  | Peroxide, Behaviour of, to Sulphuric Acid. (Lunge.) (i, 1882).....                                         | 107  |
| In Coal and Coke, Determination of. (Schmitz.) (v, 1886).....                                     | 506                  | Peroxide, Dissociation of. (Natanson.) (iv, 1885).....                                                     | 403  |
| In Coal-Gas. (Davis.) (xi, 1892).....                                                             | 496                  | Preparation of Pure. (Le Duc.) (xi, 1892).....                                                             | 269  |
| In Coal-Gas, Estimation of. (New.) (vi, 1892).....                                                | 415                  | Production of, from Air. (P) Chapman. (xii, 1893).....                                                     | 863  |
| In Fertilisers, Determination of. (Sherman.) (xiv, 1895).....                                     | 989                  | Relation of, to Arable Soil. (Schlosing and others.) (vii, 1888).....                                      | 757  |
| In Fuels, and Yield of Ammonia therefrom. (Fichauer.) (xiv, 1895).....                            | 143                  | Ruffe's Method for Determination of. (Fassbender.) (i, 1882).....                                          | 384  |
| In Guano, Estimation of. (König.) (i, 1882).....                                                  | 461                  | Secondary Products containing. (Hosva.) (xii, 1894).....                                                   | 792  |
| In Leather Waste. (Daugny.) (iv, 1885).....                                                       | 538                  | Separation of Carbonic Oxide from. (P) Gardner, From Henderson. (vii, 1888).....                           | 315  |
| In Manures, Determination of:                                                                     |                      | Separation of Sulphuretted Hydrogen from. (P) Parnell and Simpson. (v, 1886).....                          | 33   |
| (Aubin and Quenot.) (ix, 1890).....                                                               | 773                  | Soda-Lime Method for Determining. (Atwater and Woods.) (vi, 1887).....                                     | 840  |
| (Stutzer and Reitmeyer.) (vi, 1887).....                                                          | 457                  | Sources of Loss in Estimation of. (Atwater and Ball.) (vii, 1888).....                                     | 528  |
| In Manures, Estimation of. (v, 1886).....                                                         | 540                  | Substitution in Groups linked to. (Matignon.) (xi, 1892).....                                              | 937  |
| (Wagner.) (iv, 1885).....                                                                         | 124                  | Supplied as a Nitrate to Plants. (Wolf and Kreuzhage.) (vii, 1888).....                                    | 921  |
| In Meat Extracts, Determination of. (Stutzer.) (xiv, 1895).....                                   | 897                  | Tetroxide, Formation of. (Lunge and Naef.) (iii, 1884).....                                                | 635  |
| In Nitrates and Mixtures, Determination of. (Schenke.) (vii, 1893).....                           | 1063                 | Tetroxide, Influence of, on Specific Gravity of Nitric Acid. (Lunge and Marchlewski.) (xi, 1892).....      | 775  |
| In Nitrates and Nitric Acid, Determination of. (Stoklasa.) (xii, 1893).....                       | 711                  | Tetroxide, Manufacture and Application of. (i, 1882).....                                                  | 159  |
| In Nitrates, Determination of. (Sullwold.) (x, 1891).....                                         | 164                  | Transformation of, into Ammonia. (Schreuer-Kesner.) (ii, 1883).....                                        | 407  |
| In Nitrates, Estimation of:                                                                       |                      | Treatment of Products of Combustion of Fuels containing. (P) Derby. (iii, 1884).....                       | 163  |
| (Arnold and Wedemeyer.) (xii, 1893).....                                                          | 183                  | Trioxide, Action of, on Organic Compounds. (Friedburg and Mandel.) (ix, 1890).....                         | 1072 |

## Oils—cont.

|                                                                                                                        |                                   |
|------------------------------------------------------------------------------------------------------------------------|-----------------------------------|
| Action of Metals on. (Livache.) (ii, 1883) .....                                                                       | 349                               |
| Action of, on Metals. (Redwood.) (v, 1886) .....                                                                       | 362                               |
| Action of, on Polarised Light. (Bishop.) (vi, 1887) .....                                                              | 750                               |
| Action of Sulphur Chloride on. (Fawcitt.) (vii, 1888) ..                                                               | 552                               |
| Adulteration of, in Portugal, Laws affecting. (T.R.) (xiv, 1895) .....                                                 | 84                                |
| Aerated, Compounds of, with Pyroxylin. (P) Fairfax. From Field. (xiii, 1894) .....                                     | 164                               |
| Analysis and Constitution of. (Benedikt and Ullaur.) (vii, 1888) .....                                                 | 594                               |
| Analysis of. (Archbutt.) (v, 1886) .....                                                                               | 303                               |
| And Essences, Report on Volatile. (ix, 1890) .....                                                                     | 965                               |
| And Fats, African. (T.R.) (xi, 1892) .....                                                                             | 377                               |
| And Fats, Apparatus for Purification of. (P) Lake. From de Nuge. (iv, 1885) .....                                      | 679                               |
| And Fats, Purification of, and Products from. (P) Mitchell, Hagenmum, and von Schmidt. (viii, 1889) .....              | 624                               |
| And Fats, Quantitative Estimation of: (Mills and Akitt.) (iii, 1884) .....                                             | 366                               |
| (Mills and Snodgrass.) (ii, 1883) .....                                                                                | 435                               |
| And Fats, Refining and Deodorising. (P) Wilson. (iii, 1884) .....                                                      | 450                               |
| And Fats, Separ. of, from Water. (P) Dehne. (xiv, 1895) .....                                                          | 1058                              |
| And Fats, Specific Gravity of some. (Crampton.) (viii, 1889) .....                                                     | 551                               |
| And Oil Seeds in Marseilles. (T.R.) (ix, 1890) .....                                                                   | 775                               |
| And Resins, Resistance of, to Moisture. (Laurie.) (ix, 1890) .....                                                     | 583                               |
| Aniline, Analysis of: (Reimhardt.) (xii, 1893) .....                                                                   | 954                               |
| (Schoop.) (v, 1886) .....                                                                                              | 178                               |
| Animal and Mineral, Influence of, on Machinery. (i, 1882) ..                                                           | 326                               |
| Animal, Vegetable, and Mineral, Solidifying. (P) Chenthal. (xii, 1893) .....                                           | 277                               |
| Apparatus for Burning: (P) Lindley and Browett. (x, 1891) .....                                                        | 242                               |
| (P) Rose. .....                                                                                                        | (ix, 1890), 1025; (xi, 1892), 423 |
| Apparatus for Burning Light and Heavy Portions of. (P) Thompson. From Harvey and others. (xi, 1892) .....              | 996                               |
| Apparatus for Decomposing. (P) Hecke. (i, 1882) .....                                                                  | 193                               |
| Apparatus for Deodorising. (P) Filbert. (xiv, 1895) .....                                                              | 587                               |
| Apparatus for Determining Liability of, to Spontaneous Combustion. (Richards.) (xi, 1892) .....                        | 547                               |
| Apparatus for Distill. of, into Gas. (Macadam.) (vi, 1887) ..                                                          | 199                               |
| Apparatus for Distill. of Mineral. (P) Laing. (x, 1891), 630, 631; (xi, 1892), 341; (xii, 1893), 1020                  |                                   |
| Apparatus for Extraction of: (P) Boulton. From Boulton and others. (x, 1891) .....                                     | 683                               |
| (P) Boulton. From Oppelt. (vi, 1887) .....                                                                             | 378                               |
| (P) MacLachlan. (vii, 1888) .....                                                                                      | 126                               |
| Apparatus for Filtering: (P) Pelat. (xii, 1893) .....                                                                  | 133                               |

| Hydrocarbons from, Preparation of. (Redl.) (vi, 1887).....                                                                        | 503                  |
| Illuminating and Lubricating. (P) Currie. (vii, 1888).....                                                                        | 682                  |
| Improving Viscosity of. (P) Mariott. (v, 1886).....                                                                               | 608                  |
| In Mexico. (T.R.) (xii, 1893).....                                                                                                | 77                   |
| Indices of Refraction of. (Holde.) (x, 1891).....                                                                                 | 166                  |
| Industry of, Notes on. Saponification under Pressure. (xii, 1893).....                                                            | 163                  |
| Inflammable, Steam-spray Apparatus for. (v, 1886).....                                                                            | 471                  |
| Iodine-Absorption Method of Testing. (Gantler.) (xii, 1893).....                                                                  | 717                  |
| Iodine Absorption of, Estimating. (Gantler.) (xii, 1893).....                                                                     | 717                  |
| Iodine Number of Fats and. (Schweitzer and Langwitz.) (xiv, 1895).....                                                            | 1030                 |
| Kerosene, Safety of Commercial. (Newbury and Culter.) (vii, 1888).....                                                            | 740                  |
| Lamp, Hoff's Mergamot for Distilling. (iii, 1884).....                                                                            | 101                  |
| Lavender and Bergamot. (Bertram and Walbaum.) (xi, 1892).....                                                                     | 838                  |
| Linseed and other Drying. Treatment of. (P) Ford. (iii, 1884).....                                                                | 181                  |
| Lubricating. (Charlier.) (ix, 1890).....                                                                                          | 1043                 |
| Lubricating, Analysis of. (Stillman.) (xiii, 1894).....                                                                           | 286                  |
| Lubricating and Tempering. Treating. (P) Graf. (xi, 1892).....                                                                    | 446                  |
| Lubricating, Apparatus for Cooling. (P) Crawshaw. (viii, 1889).....                                                               | 714                  |
| Lubricating, Apparatus for Treating Waste. (P) Stott. (vi, 1887).....                                                             | 665                  |
| Lubricating, Behaviour of, at Low Temperatures. (Hoffmeister.) (vii, 1889).....                                                   | 423                  |
| Lubricating, Changes in, on Keeping. (Holde.) (xi, 1892).....                                                                     | 619                  |
| Lubricating, Conditions of Tender for, to Prussian State Railways. (Albrecht.) (xii, 1893).....                                   | 163                  |
| Lubricating, Experiments with. (Lamansky.) (ii, 1883).....                                                                        | 417; (iv, 1885), 406 |
| Lubricating, Flashing Point of: (Holde.)..... (viii, 1889), 734; (ix, 1890), 329 (Martens)..... (ix, 1890), 902; (xii, 1893), 936 |                      |
| Lubricating, for Wools, Preparation of. (P) Rumble and Sear. (iv, 1885).....                                                      | 679                  |
| Lubricating, Manufacture of: (Ljutyk.) (iv, 1885).....                                                                            | 111                  |
| (P) Seger. (iv, 1885).....                                                                                                        | 407                  |
| Lubricating, Measurement of Frictions of. (Woodbury.) (iv, 1885).....                                                             | 503                  |
| Lubricating, Mineral, Estimation of Ash in. (Stepanow.) (xii, 1893).....                                                          | 552                  |
| Lubricating, Purity of Fatty. (Holde.) (xiv, 1895).....                                                                           | 586                  |
| Lubricating, Refining. (Redl.) (v, 1886).....                                                                                     | 494                  |
| Lubricating, Refining of, and Apparatus therefor. (Sches-topal.) (x, 1891).....                                                   | 454                  |
| Lubricating, Solidifying Point of, Determination of. (Martens) (ix, 1890).....                                                    | 772                  |
| Lubricating, Testing Machine. (Bach.) (viii, 1889).....                                                                           | 990                  |
| Lubricating, Thickening Materials for. (Marquardt.) (v, 1886).....                                                                | 539                  |
| Lubricating, Valuation of. (Lew.) (x, 1891).....                                                                                  | 777                  |
| Lubricating, Viscosimeter for. (Kunkler.) (xii, 1894).....                                                                        | 543                  |
| Lubricating, Viscosities of Russian and American. (Redwood.) (iv, 1885).....                                                      | 77                   |
| Lubricating, Viscosity of. (Traube.) (vi, 1887).....                                                                              | 414                  |
| Lubricating, Viscosity of, Determination of the. (Martens.) (ix, 1890).....                                                       | 1042                 |
| Mace and Nutmeg. (Semmler.) (ix, 1890).....                                                                                       | 962                  |
| Machine, Sale of. (Seifert.) (ii, 1883).....                                                                                      | 481                  |
| Marine, Analysis of. (Moore.) (ix, 1890).....                                                                                     | 231                  |
| Maturing. (P) Leverett. (xiv, 1895).....                                                                                          | 981                  |
| Mauwene's Test for. (Ellis.) (v, 1886).....                                                                                       | 150, 361             |
| Means for Extracting. (P) MacIlwaine. (vi, 1887).....                                                                             | 294                  |
| Medicinal, Preparation of: (P) Mackay. (vi, 1887).....                                                                            | 835                  |
| (P) Radley. (iv, 1885).....                                                                                                       | 497                  |
| Mentha Piperita and Mentha Viridis, Comparison of. (Trimble.) (v, 1886).....                                                      | 173                  |
| Mineral, Action of Atmospheric Oxygen on. (Hirsch.) (xiv, 1895).....                                                              | 586                  |
| Mineral, Adulteration of, with Goutchoue. (Holde.) (x, 1891).....                                                                 | 330                  |
| Mineral and Fatty, Determination of Resin Oil in. (Holde.) (x, 1891).....                                                         | 661                  |
| Mineral and other, Preparation of. (P) Baillard. (vii, 1888).....                                                                 | 507                  |
| Mineral and Resin, in Fats, Oils, Oleins, &c., Detection of. (Focke.) (v, 1886).....                                              | 176                  |
| Mineral and Sperin, Analysis of. (Lobry de Bruyn.) (xiii, 1894).....                                                              | 426                  |
| Mineral, Apparatus for Bleaching or Purifying Dark. (P) Thompson. (iv, 1885).....                                                 | 275                  |
| Mineral, Apparatus for Burning. (P) Chandor. (vi, 1887).....                                                                      | 815                  |
| Mineral, Apparatus for Determining Flash Points of. (Gray.) (x, 1891).....                                                        | 348                  |
| Mineral, Apparatus for Distilling: (P) Henderson..... (v, 1886), 376; (ix, 1890), 1120 (P) Laing. (x, 1891).....                  | 630, 631             |
| (P) Tervet. (vi, 1887).....                                                                                                       | 134                  |
| Mineral, Apparatus for Refining. (P) Henderson. (ii, 1883).....                                                                   | 474                  |

| Mineral, Apparatus for Separating, from other Oils. (P) Craig, Neilson, and Snodgrass. (vii, 1888).....   | 126                   |
| Mineral, Apparatus for Washing, with Acids. (P) Thompson. (vi, 1887).....                                 | 591                   |
| Mineral, Bromine Absorption of. (McArthur.) (vii, 1888).....                                              | 64                    |
| Mineral, By-products obtained in Manufacture of. (Rich-ter.) (ii, 1883).....                              | 474                   |
| Mineral, Combustion of, in Lamps. (Koundiy.) (xiv, 1895).....                                             | 953                   |
| Mineral, Customs Duties on, in Italy. (T.R.) (x, 1891).....                                               | 732                   |
| Mineral, Destructive Distillation of. (P) Laing. (x, 1891).....                                           | 534                   |
| Mineral, Detection of Fat Oils in: (Lux.) (iv, 1885).....                                                 | 745                   |
| (Rohemann.) (xii, 1893).....                                                                              | 470                   |
| Mineral, Discussion on the Flashing Point of. (xii, 1893).....                                            | 391                   |
| Mineral, Distillation of. (P) Young and Beilby. (ix, 1890).....                                           | 278                   |
| Mineral, Distillation of, and Apparatus therefor: (P) Dewar and Redwood. (ix, 1890).....                  | 731, 924              |
| (P) Laing. (x, 1891).....                                                                                 | 534                   |
| Mineral, Distillation of, Method and Apparatus for. (P) Young and Beilby. (ix, 1885).....                 | 274, 275              |
| Mineral, Dyestuffs from Natural, Producing. (P) Frasch. (xii, 1893).....                                  | 756                   |
| Mineral, Export of, from the United States. (T.R.) (ix, 1890).....                                        | 124                   |
| Mineral, Fire-test of. (P) Smith. (ii, 1883).....                                                         | 38                    |
| Mineral, Flash Point and Heat of Burning of. (xii, 1893).....                                             | 248                   |
| (Stewart.) (xi, 1892).....                                                                                | 885                   |
| Mineral, Flashing Point of: (Aisinmann.) (xiv, 1895).....                                                 | 284                   |
| (Levinstein.) (xiii, 1894).....                                                                           | 116                   |
| Mineral, for Manufacturing Purposes, Preparation of. (P) Swallow. (iv, 1885).....                         | 584                   |
| Mineral, Furnaces for Distilling. (P) Morton and Fyfe. (v, 1886).....                                     | 594                   |
| Mineral, Gas from, Production of. (P) Young and Bell. (xii, 1893).....                                    | 666                   |
| Mineral, Illuminating Gas from. (P) Young. (xiii, 1894).....                                              | 934                   |
| Mineral, Imperfect Solubility of, in Petroleum Spirit. (Bender.) (x, 1891).....                           | 354                   |
| Mineral, in British India. (T.R.) (ix, 1890).....                                                         | 562                   |
| Mineral, in Fats and Waxes, Estimation of. (Horn.) (vii, 1888).....                                       | 696                   |
| Mineral, in Fats, Estimation of. (Finkener.) (v, 1886).....                                               | 457                   |
| Mineral, in Russia, Consumption of. (T.R.) (vi, 1887).....                                                | 228                   |
| Mineral, in Russia, Increase of Import Duty on. (T.R.) (vii, 1888).....                                   | 138                   |
| Mineral, Indian Trade in. (T.R.) (viii, 1889).....                                                        | 660                   |
| Mineral, Indices of Refraction of. (Holde.) (x, 1891).....                                                | 166                   |
| Mineral Lubricating. (Kunkler.) (ix, 1890).....                                                           | 197, 198              |
| Mineral, Lubricating Action of, on Metals. (Aisinmann.) (xiv, 1895).....                                  | 811                   |
| Mineral Lubricating, Artificial. (Kraemer and Spilker.) (xi, 1892).....                                   | 22                    |
| Mineral Lubricating, Conditions of Tender for Prussian State Railways. (Albrecht.) (xii, 1893).....       | 163                   |
| Mineral Lubricating, Estimation of Rosin Oil in. (Storch.) (vii, 1888).....                               | 135, 136              |
| Mineral Lubricating, Flashing Point of. (Holde.) (viii, 1889).....                                        | 734                   |
| Mineral Lubricating, Manufacture of. (v, 1886).....                                                       | 382                   |
| Mineral Lubricating, Test of. (Falke.) (iv, 1885).....                                                    | 504                   |
| Mineral Lubricating, Used in Italy. (Villavecchia, and Fabris.) (x, 1891).....                            | 390                   |
| Mineral, Machine Oil and Vaseline from, Production of. (viii, 1889).....                                  | 202                   |
| Mineral, Manufacture of Gas from: (P) Galletly and Armour. (xiv, 1895).....                               | 140                   |
| (P) Laing. (xii, 1893).....                                                                               | 1020                  |
| Mineral, Nitronaphthalene in, Detection of. (Leonard.) (xiii, 1894).....                                  | 69                    |
| Mineral, on Ships in the Tropics. (Lobry de Bruyn.) (xiii, 1894).....                                     | 257                   |
| Mineral, Purification of. (P) Roth. (iv, 1885).....                                                       | 459                   |
| Mineral, Purification of, and Production of Alcohol. (P) Thompson. From Maris and Notkin. (ix, 1890)..... | 852                   |
| Mineral, Pyridine Bases in. (Zaloziecki.) (xii, 1893).....                                                | 137                   |
| Mineral, Qualitative Reaction of. (Holde.) (xi, 1892).....                                                | 272                   |
| Mineral, Refining. (Redl.) (vi, 1887).....                                                                | 504                   |
| Mineral, Removal of Sulphur from. (Riche and Roume.) (xiii, 1894).....                                    | 719                   |
| Mineral, Removing Black Acid in Purification of. (Falke.) (v, 1886).....                                  | 160                   |
| Mineral, Resin Content and Resinification of. (Holde.) (xiv, 1895).....                                   | 894                   |
| Mineral, Resin Oil in, Determination of. (Holde.) (x, 1891).....                                          | 661                   |
| Mineral, Separation of, from other Oils. (P) Craig, Neilson, and Snodgrass. (vii, 1888).....              | 126                   |
| Mineral, Separation of Rosin Oil from. (McIlhenny.) (xiv, 1895).....                                      | 198                   |
| Mineral, Solidification of. (P) Chenhall. (xi, 1892).....                                                 | 670; (xii, 1893), 277 |
| Mineral, Solubility of, in Alcohol. (Aisinmann.) (xiv, 1895).....                                         | 812                   |
| Mineral, Solubility of Various, in Glacial Acetic Acid. (Valenta.) (iii, 1884).....                       | 643                   |
| Mineral, Sulphonic Acids from, Production of. (P) Clark. From Gewerkschaft Messel. (xi, 1892).....        | 22                    |

| (Livache.) (v, 1886).....                                                                           | 491  |
| Oxidation of, for Use in Paints, &c. (P) Thorne and Brin's Oxygen Company, Limited. (ix, 1890)..... | 1046 |
| Oxidising. (P) Schill and Seilacher. (vi, 1887).....                                                | 549  |
| Ozonised, Producing. (P) Pickenbrock. (x, 1891).....                                                | 159  |
| Paint, Preparation of. (P) Baptista. (x, 1891).....                                                 | 840  |
| Palin Nut and Cotton Seed. (iii, 1884).....                                                         | 181  |
| Paraffin, Nitrogen of. (Beilby.) (x, 1891).....                                                     | 120  |
| Paraffin, of Lignite Tar, Refining. (Von Hoyer.) (ix, 1890).....                                    | 487  |
| Paraffin, Production of Gas from. (Tocher.) (xii, 1894).....                                        | 231  |
| Paraffin, Production of Hydrocarbons from. (vi, 1887).....                                          | 282  |
| Paraffin, Purification of. (P) Beilby. (iv, 1885).....                                              | 584  |
| Petroleum, Comp. of. (Mabery and Smith.) (x, 1891).....                                             | 629  |
| Petroleum, Crude. (Woodman.) (x, 1891).....                                                         | 826  |
| Petroleum, of New Zealand. (T.R.) (x, 1891).....                                                    | 394  |
| Petroleum, Tinting. (P) Phillips. (vi, 1887).....                                                   | 283  |
| Petroleum, Treatment of. (P) Labois. (xi, 1892).....                                                | 694  |
| Preserving. (P) Watel. (xiii, 1894).....                                                            | 531  |
| Purification and Bleaching of Distillable. (P) Baynes and Fearenside. (iii, 1884).....              | 438  |
| Purification of:                                                                                    |      |
| (P) Barlow. From Chaudet. (i, 1882).....                                                            | 112  |
| (P) Burton. (xiv, 1895).....                                                                        | 44   |
| (P) Lord. (vii, 1888).....                                                                          | 756  |
| (P) Villon. (xiv, 1895).....                                                                        | 665  |
| Purification of, Continuous. (Villon.) (xiii, 1894).....                                            | 745  |
| Purification of, Process and Apparatus for. (P) Wayland. (xii, 1893).....                           | 940  |
| Reaction of, with Nitrate of Silver. (Brullé.) (viii, 1889).....                                    | 924  |
| Refining and Deodorising Refuse. (P) Wilson. (xi, 1892).....                                        | 757  |
| Refining, Deodorising, and Purifying. (P) Tichenor. (iii, 1884).....                                | 33   |
| Refining Spirits from, and Apparatus therefor. (P) Somers. (x, 1891).....                           | 844  |
| Regulations Affecting Sale of, in Spain. (T.R.) (xi, 1892).....                                     | 714  |
| Removing Green Colour from. (P) Wendland. (xiii, 1894).....                                         | 830  |
| Rendering, Consistent by Means of Oxygen. (P) Opperbeck. (xii, 1893).....                           | 363  |
| Resin, Indices of Refraction of. (Holde.) (x, 1891).....                                            | 166  |
| Rose, Ethyl Alcohol in German and Turkish. (Poleck.) (xii, 1893).....                               | 373  |
| Rose, German and Turkish. (Poleck.) (x, 1891).....                                                  | 269  |
| Rosin, Detection of, in Essence of Turpentine. (Zune.) (xi, 1892).....                              | 637  |
| Rosin, Distinguishing First and Second Distillation of. (Chenevier.) (ix, 1890).....                | 825  |
| Rosin, in other Oils, Detection of. (Holde.) (vii, 1888).....                                       | 526  |
| Saponifying or Mixing. (P) Sahlstrom and Parr. (xiii, 1894).....                                    | 139  |
| Shale, Bonities on Manufacture of, in France. (T.R.) (xiii, 1894).....                              | 183  |
| Seed, Brullé's Reaction for. (Holde.) (xi, 1892).....                                               | 272  |
| Seed, Mannf. of, at Stuttgart. (T.R.) (vii, 1888).....                                              | 874  |
| Seed, Testing. (Brullé.) (x, 1891).....                                                             | 390  |
| Separation of, from other Substances. (P) Craig and others. (vi, 1887).....                         | 294  |
| Separation of Glycerin from. (P) Brookes. (v, 1886).....                                            | 431  |
| Shale, Purification of. (P) Urquhart. From Playfair. (ii, 1883).....                                | 239  |
| Solar, Russian, as Illuminants. (Lissenko.) (xii, 1893).....                                        | 819  |
| Solubility of Indigo in. (Proude and Wood.) (xiv, 1895).....                                        | 1027 |
| Solvent Action of Acetic Acid on. (Valenta.) (iii, 1884).....                                       | 524  |
| Spontaneous Combustion of, on Cotton. (Mackey.) (xiii, 1894).....                                   | 1164 |
| Steam Treatment of. (P) Petty. (xii, 1893).....                                                     | 946  |
| Sweetening. (P) Hein. (ix, 1890).....                                                               | 319  |
| Table, in Germany. (T.R.) (xiii, 1894).....                                                         | 80   |

| Apparatus for Separating Precious Metals from. (P) Schill. (ix, 1890) .....                              | 950      |
| Apparatus for Smelting. (P) Adams. (viii, 1889) .....                                                    | 989      |
| Apparatus for Sorting and Washing. (P) Jouffrey and Chevalier. (i, 1882) .....                           | 411      |
| Apparatus for Treating:                                                                                  |          |
| (P) Cherry. (v, 1886) .....                                                                              | 607      |
| (P) Justice. From The Frue Vanning Machine Co. (v, 1886) .....                                           | 328      |
| (P) Mumford and Moodie. (iii, 1884) .....                                                                | 640      |
| (P) Parnell. (ix, 1890) .....                                                                            | 626      |
| (P) Wallace. (xii, 1893) .....                                                                           | 47       |
| (P) Young. (xi, 1892) .....                                                                              | 260      |
| Apparatus for Treating Auriferous, by Electrolysis. (P) Cassel. (v, 1886) .....                          | 454      |
| Apparatus for Treating Iron, and Burning the Fumes therefrom. (P) Conley and Lancaster. (ix, 1890) ..... | 948      |
| Apparatus for Treating Metallic. (P) Alley. (ix, 1890) ..                                                | 726      |
| Apparatus for Treatment of Refractory Gold and Silver. (P) Hutchinson. (viii, 1889) .....                | 287      |
| Apparatus for Washing:                                                                                   |          |
| (P) Gray. (v, 1886) .....                                                                                | 431      |
| (P) Hornbostel. (i, 1882) .....                                                                          | 325      |
| Appliances for Treatment of. (P) Fuller. (xiii, 1894) ..                                                 | 41       |
| Arsenic and Phosphorus in, Estimation of. (Pattinson.) (xii, 1893) .....                                 | 119      |
| Arsenic in, Estimation of. (Lehmann and Mager.) (v, 1886) .....                                          | 510      |
| Assay of Antimony. (Carnot.) (xi, 1892) .....                                                            | 941      |
| Burnt, Determination of Sulphur in. (Keller and Maas.) (xiv, 1895) .....                                 | 822      |
| Calcining Gold-bearing. (P) Hutton. (viii, 1889) .....                                                   | 200      |
| Calcining Sulphurous. (P) Fleming. (vii, 1888) .....                                                     | 504      |
| Charges for Smelting Lead and Silver. (Watson.) (xii, 1894) .....                                        | 1140     |
| Chlorinating. (P) Mears. (ii, 1883) .....                                                                | 181      |
| Chlorination of Gold. (Godshall.) (xiii, 1894) .....                                                     | 155, 157 |
| Composition for Treating Gold and Silver. (P) Kendall. (xii, 1894) .....                                 | 800      |
| Concentration of Pyritic. (P) Wallis. (xii, 1893) .....                                                  | 160      |
| Containing Antimony Sulphide, Treatment of. (P) Simpson and Parnell. (iv, 1885) .....                    | 123      |
| Containing Antimony, Treatment of:                                                                       |          |
| (P) Beveridge. (iii, 1884) .....                                                                         | 447      |
| (P) Butterfield. (iii, 1884) .....                                                                       | 180      |
| Containing Copper or Nickel, Treatment of. (P) Johnson. From Hermite. (iv, 1885) .....                   | 121      |
| Containing Gold and Silver, Treating. (P) Johnson. From Pelatan and Clerici. (xiv, 1895) .....           | 582      |
| Containing Iron and Manganese, Volumetric Method of Estimating Zinc in. (Fahlberg.) (i, 1882) .....      | 276      |
| Containing Numerous Metallic Bases, Treatment of. (P) Maxwell-Lyte. (i, 1882) .....                      | 236      |
| Containing Sulphur, Treatment of. (P) Lewis and Gelscharp. (xii, 1893) .....                             | 312      |
| Containing Titanium, Estimation of Phosphorus in. (Pattinson.) (xiv, 1895) .....                         | 443      |
| Containing Various Minerals, Obtaining Gold and Silver from. (P) De Vaureal. (ii, 1883) .....            | 284      |
| Containing Zinc, Treatment of:                                                                           |          |
| (P) Hart. (xi, 1892) .....                                                                               | 352      |
| (Hart.) (xiv, 1895) .....                                                                                | 544      |
| (P) Penrose. (xii, 1893) .....                                                                           | 522      |
| Converters for Smelting and Refining. (P) Allen. (xii, 1894) .....                                       | 1203     |
| Converting Pulverised Metallic Oxides into Solid. (P) Henzel. (xii, 1893) .....                          | 695      |
| Copper and Silver from their, Obtaining. (x, 1891) .....                                                 | 469      |
| Copper, Discussion on Valuation of. (v, 1886) .....                                                      | 277      |
| Copper in, Determination and Valuation of. (Westmoreland.) (v, 1886) .....                               | 18       |
| Cyanide Process for Extracting Gold from Low Grade. (Young and Smith.) (x, 1891) .....                   | 93       |
| Desulphurising:                                                                                          |          |
| (P) Harris. (i, 1882) .....                                                                              | 507      |
| (P) Lake. From Peck. (viii, 1889) .....                                                                  | 400      |
| Desulphurising Zinc. (P) Hart. (xi, 1892) .....                                                          | 523      |
| Direct Prod. of Metals from their. (Lebedieff.) (xi, 1892) ..                                            | 245      |

| Carbon Acids of Meta-amido-, Obtaining. (P) Kolbe. (ix, 1890) .....                                                         | 762  |
| Cause of Red Coloration of. (Kohn and Fryer.) (xii, 1893) .....                                                             | 107  |
| Colouring Matter, Lichermann's. (Lehmann and Petri.) (v, 1886) .....                                                        | 238  |
| Combining certain Diazo Compounds with. (P) Clark. From Krugener and Farb. vormals Brünner. (iv, 1885) .....                | 490  |
| Compound of Sulphur Dioxide with. (Wolzer.) (i, 1882) .....                                                                 | 398  |
| Compound of Sulphurous Anhydride with. (Holzer.) (i, 1882) .....                                                            | 442  |
| Compounds. (Desesquelle.) (xiii, 1894) .....                                                                                | 835  |
| Compounds of Phenoxides with. (De Forerand.) (xii, 1893) .....                                                              | 619  |
| Constituents of Blast Furnace Tar. (Smith, Coutts, and Brothers.) (iv, 1885) .....                                          | 738  |
| Conversion of Higher Homologues of, into Amines. (Lloyd.) (vi, 1887) .....                                                  | 632  |
| Conversion of, into Diphenol. (Diauin.) (ii, 1883) .....                                                                    | 237  |
| Crystallised, as Reagent for Nitrates and Nitrites. (Hager.) (iv, 1885) .....                                               | 613  |
| Determination of. (Carre.) (xi, 1892) .....                                                                                 | 273  |
| Determination of, as Tribromophenol. (Beckurts.) (v, 1886) .....                                                            | 546  |
| Ether, Manufacture of. (P) Dawson and Hirsch. (x, 1891) .....                                                               | 538  |
| Ethers, Para-amido-, Manufacture of. (P) B. Willcox. From The Farbenfabriken vormals F. Bayer and Co. (ix, 1890) .....      | 324  |
| Extraction of, from Coal-tar Oils. (P) Wischin. (i, 1882) .....                                                             | 63   |
| Formation of Aniline and Diphenylamine from. (Merz and Müller.) (vi, 1887) .....                                            | 138  |
| Formation of Tartaric Acid by Oxidation of. (Doebner.) (x, 1891) .....                                                      | 819  |
| Homologues, Transformation of Camphophenolsulphonic Acids into. (Cazeneuve.) (x, 1891) .....                                | 723  |
| Hydrate, Preparation of. (Alexejeff.) (i, 1882) .....                                                                       | 397  |
| Iod Carboic Acid, Determination of:                                                                                         |      |
| (Beckurts.) (v, 1886) .....                                                                                                 | 547  |
| (Göth.) (v, 1886) .....                                                                                                     | 618  |
| In Creosote, Determination of. (Kienert.) (iii, 1884) .....                                                                 | 318  |
| In Pinus Sylvestris. (Griffiths.) (iii, 1884) .....                                                                         | 375  |
| Influence of Glycerin, &c., on Bactericidal Action of. (Lensi.) (xiii, 1894) .....                                          | 903  |
| Iodised Sulpho Acids of. (P) Ostermayer. (vii, 1888) .....                                                                  | 745  |
| Manufacture of. (P) Krafft and Roos. (xiii, 1894) .....                                                                     | 759  |
| Manufacture of Higher Homologues of. (P) Liebmann. (i, 1882) .....                                                          | 102  |
| Occurrence of, in Brown Coal-Tar. (Rosenthal.) (ix, 1890) .....                                                             | 926  |
| Of Birchwood Tar. (Prenger.) (x, 1891) .....                                                                                | 354  |
| Of Sassafras Oil. (Pomeranz.) (ix, 1890) .....                                                                              | 761  |
| o-Amido-, Action of Chlorine on. (Zincke and Küster.) (ix, 1890) .....                                                      | 601  |
| o-Amido-, Presence of Sulphur in. (Hantzsch and Freese.) (xiv, 1895) .....                                                  | 398  |
| Or Orthocresylol, Manufacture of Yellow Colouring Matters from. (P) Forcl. (vii, 1888) .....                                | 320  |

|                                                                                                                                                            | PAGE |

| <i>p</i> -Amido-, Colour Reaction for. (Michaelis and Luxemburg.) (xiv, 1895).....                                                                         | 513  |
| <i>p</i> -Amido-, Ethers and Aromatic Oxaldehydes, Manufacture of Compounds of. (P) Imray. From The Society of Chemical Industry, Basle. (xiii, 1894)..... | 274  |
| Para-Amido-, Production of Two Isomeric Disulpho Acids of. (P) Geigy. (xii, 1893).....                                                                     | 755  |
| Perechloro-, Production of, from Perechlorobenzene. (Weber and Wolff.) (iv, 1885).....                                                                     | 270  |
| Phenylthrene in, Detection of. (Fabini.) (x, 1891).....                                                                                                    | 800  |
| Precipitation of, by Means of Carbonic Acid. (Lunge.) (ii, 1883).....                                                                                      | 165  |
| Products of <i>m</i> -Nitrobenzaldehyde with. (Varda and Zeoni.) (x, 1891).....                                                                            | 830  |
| Reddening of. (Sicha.) (i, 1882).....                                                                                                                      | 495  |
| Series, Isomeric Change in the. (Ling.) (vi, 1887).....                                                                                                    | 720  |
| Sulphonic Acid from Camphor. (Cazeneuve.) (x, 1891).....                                                                                                   | 270  |
| Sulphonic Acids, Amido-. (Brunner and Kramer.) (iv, 1885).....                                                                                             | 51   |
| Unstable Compound of, with Carbonic Anhydride. (Klepl.) (i, 1882).....                                                                                     | 442  |
| Volumetric Determination of. (Chandon.) (i, 1882), 494; (ii, 1883).....                                                                                    | 166  |
| Volumetric Estimation of. (Diacaosa.) (i, 1882).....                                                                                                       | 203  |
| Phenols, Action of Aldehydes on:                                                                                                                           |      |
| (Michael.) (iii, 1884).....                                                                                                                                | 253  |
| (Michael and Comey.) (iii, 1884).....                                                                                                                      | 250  |
| Action of, on Cinnamic Aldehyde. (Ihl.) (viii, 1889).....                                                                                                  | 640  |
| Action of, on Honey, and the Product of Spent Sulphite Solutions. (Ihl.) (ix, 1890).....                                                                   | 418  |
| Amido-, Carbonic Esters of Acidyl Derivatives of. (P) Imray. From The Farbwerke vormals Meister, Lucius and Brüning. (xiv, 1895).....                      | 1061 |
| Amido-, Ethylenic Ethers of. (Krohn.) (ix, 1890).....                                                                                                      | 280  |
| Amido-, Manufacture of. (P) Lake. From Leonhardt and Co. (ix, 1890).....                                                                                   | 608  |
| Amido-, Obtaining, in Free State. (Lumière and Seyewetz.) (ix, 1890).....                                                                                  | 864  |
| And Acetic Acid, Condensation Products of. (Rasinski.) (ii, 1883).....                                                                                     | 169  |
| And Phenylamines, Compounds of Benzotrichloride with. (Döbner.) (ii, 1883).....                                                                            | 272  |
| And their Derivatives, Combinations of Camphor with. (Leger.) (ix, 1890).....                                                                              | 1149 |
| Aqueous Solutions of. (P) Helmers. (xiii, 1894).....                                                                                                       | 900  |
| Combination of Tetrazo Compounds with. (P) Paul. (vii, 1888).....                                                                                          | 432  |
| Combinations of, with Benzyltrichloride. (Döbner.) (ix, 1890).....                                                                                         | 496  |
| Compounds of Fatty Acids with. (Nencki.) (ix, 1890).....                                                                                                   | 411  |
| Compounds of Mercury with. (Merck.) (viii, 1889).....                                                                                                      | 722  |
| Compounds of Phthalic Acid with. (Bayer.) (i, 1882).....                                                                                                   | 446  |
| Compounds of Quinoline with. (Hock.) (ii, 1883).....                                                                                                       | 265  |
| Compounds of Sugar with Polyhydric. (Fischer and Jennings.) (xiii, 1894).....                                                                              | 765  |
| Compounds of, with Amido-bases. (Dale and Schorlemmer.) (ii, 1883).....                                                                                    | 268  |
| Condensation of Aromatic Aldehydes with. (Trzeinski.) (iii, 1884).....                                                                                     | 252  |
| Contained in Coal Tar, High-Boiling. (Noelting.) (iii, 1884).....                                                                                          | 234  |
| Detection of. (Laubert.) (xii, 1893).....                                                                                                                  | 713  |
| Determination of. (Messinger and Vortmann.) (ix, 1890).....                                                                                                | 1470 |
| Dichlorines from. (Brunner and Chuit.) (vii, 1888).....                                                                                                    | 670  |
| Dye-stuffs from, Preparation of. (P) Geigy. (i, 1882).....                                                                                                 | 404  |
| Ethyl. (Behal and Choay.) (xiii, 1894).....                                                                                                                | 794  |
| From Carbolic Oils, Yield of. (Smith.) (ii, 1883).....                                                                                                     | 501  |
| From Creosote Oils, Results of Fractional Distillation of. (Smith.) (ii, 1883).....                                                                        | 497  |
| From Jameson Coke Oven Tar Oils, Examination of. (Smith.) (ii, 1883).....                                                                                  | 499  |
| Introducing Benzene Residue into Nucleus of. (P) Liebmman. (i, 1882).....                                                                                  | 402  |
| Iodine Compounds from, Production of. (P) Newton. From Farbenfabriken vormals F. Bayer and Co. (xii, 1893).....                                            | 785  |
| Iodine Substitution Products of, Production of. (P) Wilcox. From The Farbenfabriken vormals F. Bayer and Co. (xi, 1892).....                               | 370  |
| Mono-iodo-. (Noelting and Strieker.) (vii, 1888).....                                                                                                      | 562  |
| New Ethers of. (Staedel.) (ii, 1883).....                                                                                                                  | 344  |
| Nitro- and Amido-, Preparation of. (P) Deninger. (viii, 1889).....                                                                                         | 538  |
| Of Fluorene and Acenaphthene. (P) Holliday and Hodgkinson. (iii, 1884).....                                                                                | 319  |
| Periodicities of, Manufacture of. (P) Wilcox. From The Farbenfabriken vormals F. Bayer and Co. (ix, 1890), 412; (xii, 1893).....                           | 460  |
| Poly-, Blue Reactions of the. (Cazeneuve.) (xiii, 1894).....                                                                                               | 1098 |
| Preparation of. (P) Actien-gesellschaft für Anilinfabrikation. (i, 1882).....                                                                              | 226  |
| Presence of High-Boiling, in Coal-Tar. (Schulze.) (iv, 1885).....                                                                                          | 333  |
| Production of Colouring Matters by Action of Aromatic Nitro Substitution Products on. (Brunner.) (i, 1882).....                                            | 102  |
| Reaction of Some, in Presence of Chloroform and Alkali. (ix, 1890).....                                                                                    | 974  |
| Reactions of Chelidonium with. (Battandier.) (xiv, 1895).....                                                                                              | 398  |
| Sulpho-conjugated, Derived from Camphor. (Cazeneuve.) (ix, 1890).....                                                                                      | 647  |

| (P) Tomlinson. (iii, 1884).....                                                                                 | 260      |
| Of Paris, Substitute for. (P) Boulton. From Caspari. (ii, 1883).....                                            | 542      |
| Of Paris, Treatment of. (P) Boekbinder. (ii, 1888).....                                                         | 542      |
| Preventing Deterioration of. (P) Aitken. (xi, 1892).....                                                        | 606      |
| Production of. (P) Bloomfield. (xii, 1893).....                                                                 | 604, 764 |
| Production of Cement for. (P) Sharpe and Turner. (viii, 1889).....                                              | 622      |
| Treating Waste, for Obtainment of. (P) Lester and Thomlinson. (xiv, 1895).....                                  | 483      |
| Waterproofing Composition for, &c. (P) Sinclair and Mackay. (x, 1891).....                                      | 374      |
| Plasters, Manufacture of. (P) Gillam. (viii, 1889).....                                                         | 714      |
| Manufacture of Cements or. (P) Alison. (vi, 1887).....                                                          | 218      |
| Plastering Compositions. (P) Robinson and Terry. (x, 1891).....                                                 | 141      |
| For Ceilings and Partitions. (P) Jung. (xiii, 1894).....                                                        | 1063     |
| Plastic Compounds, Manufacture of: (P) Goolden. (v, 1886).....                                                  | 172      |
| (P) Mackay. (iv, 1885).....                                                                                     | 118      |
| (P) Menzies. (xi, 1892).....                                                                                    | 697      |
| (P) Merritt. (v, 1886).....                                                                                     | 100      |
| (P) Robertson. From Kennedy. (xi, 1892).....                                                                    | 1012     |
| Material, Production of. (P) Lake. From Sochazewski. (x, 1891).....                                             | 549      |
| Plate-Columns, Comparative Efficiency of. (Lunge.) (xii, 1893).....                                             | 417      |
| Towers, Results of the Lunge-Rohrbaum. (Lunge.) (xiii, 1894).....                                               | 1034     |
| Plates and Pots, Porous, for Galvanic Batteries. (P) Coad. (iii, 1884).....                                     | 414      |
| And Prints, Apparatus for Washing Photographic. (P) Tylar. (viii, 1889).....                                    | 477      |
| Apparatus for Coating Metal. (P) Rogers and Player. (x, 1891).....                                              | 645      |
| Apparatus for Developing Photographic. (P) Fairweather. (x, 1891).....                                          | 572      |
| Apparatus for Developing Photographic Dry. (P) Niewsky. (xi, 1892).....                                         | 1032     |
| Armour, Manufacture of. (P) Rogerson. (xiv, 1895).....                                                          | 754      |
| Baths for Coating Metallic. (P) Luther. (xii, 1893).....                                                        | 523      |
| Chemicals for Development of Photographic. (P) McDonald. (x, 1891).....                                         | 573      |
| Chinese Import of Galvanised. (T.R.) (xii, 1893).....                                                           | 189      |
| Coating Copper Printing. (P) Senhouse. (v, 1886).....                                                           | 351      |
| Condensing. (P) Mackenzie. From Brante and Co. (xiii, 1894).....                                                | 930      |
| Copper-Amalgamating. (P) Atcherley and Saril. (viii, 1889).....                                                 | 804      |
| Dental Apparatus for Vulcanising. (P) Davis. (ix, 1890).....                                                    | 631      |
| Dry, Manufacture of. (P) Vogel. (vii, 1888).....                                                                | 518      |
| Effect of Quinol Monosulphonic Acid on Gelatin-Bromide. (Stebbins.) (x, 1891).....                              | 854      |
| Enamelled Iron or Steel, Manufacture of. (P) Clark. (xi, 1892).....                                             | 434      |
| Enamelling Iron. (P) Claus. (xi, 1892).....                                                                     | 435, 455 |

| Cyanide, Action of, on Silver Mercurous Chloride. (Jones.) (xii, 1893).....                                            | 984  |
| Cyanide as a Lixiviation Agent. (Janin.) (viii, 1889).....                                                             | 120  |
| Cyanide, Commercial. (Kaiser.) (xii, 1893).....                                                                        | 518  |
| Cyanide, Dissolution of Gold in Solution of. (Mac-laurin.) (xii, 1893).....                                            | 359  |
| Cyanide, Exemption of, from Duty in Chili. (T.R.) (xiii, 1894).....                                                    | 74   |
| Cyanide, Extraction of Gold by Dilute. (Goyder.) (xii, 1894).....                                                      | 522  |
| Cyanide, for Dissolving Gold. (xiv, 1895).....                                                                         | 487  |
| Cyanide in Mining. (T.R.) (xii, 1893).....                                                                             | 79   |
| Cyanide in New Zealand. (T.R.) (xii, 1893).....                                                                        | 881  |
| Cyanide, Manufacture of, from its Ferrocyanide. (P) Hetherington and others. (xiv, 1895).....                          | 271  |
| Cyanide, Oxidation of, with Permanganate. (Vollhard.) (ix, 1890).....                                                  | 1148 |
| Cyanide, Partial Substitution of Sodium Cyanide by. (Stillman.) (xii, 1893).....                                       | 41   |
| Cyanide, Preparation of. (xii, 1893).....                                                                              | 925  |
| Cyanide, Production of. (P) Schulte and Sapp. (xiv, 1895).....                                                         | 269  |
| Cyanide Solutions, Determination of Noble Metals in. (Opificius.) (vii, 1888).....                                     | 403  |
| Cyanide, Use of, in Brazil. (T.R.) (xiv, 1895).....                                                                    | 700  |
| Cyanide, Use of, in Estimation of Copper. (Ellis.) (viii, 1889).....                                                   | 686  |
| Determination of. (Villiers and Borg.) (xiii, 1894).....                                                               | 68   |
| Determination of, in Ash, Minerals, &c. (Kretschmar.) (vi, 1887).....                                                  | 523  |
| Distillation of. (P) White. (ix, 1890).....                                                                            | 627  |
| Electrolytic Production of. (P) Bull. (xii, 1893).....                                                                 | 697  |
| Estimation of. (Hilgard.) (xii, 1893).....                                                                             | 712  |
| Estimation of, as Perchlorate. (Wense.) (xi, 1892).....                                                                | 711  |
| Estimation of, by Perchloric Acid. (Caspari.) (xii, 1893).....                                                         | 549  |
| Estimation of, by Platinum Chloride. (Bauer.) (vii, 1888).....                                                         | 237  |
| Estimation of, in Manures. (v, 1886).....                                                                              | 540  |
| Estimation of, without Tared Filter Paper. (De Koninck.) (vii, 1888).....                                              | 693  |
| Ferrieyanide, Laboratory Method for Preparation of. (xiv, 1895).....                                                   | 691  |
| Ferrieyanide, Manufacture of. (Kassner.) (ix, 1890).....                                                               | 391  |
| Ferrieyanide, New Application of. (Kassner.) (ix, 1890).....                                                           | 108  |
| Ferrieyanide, Production of, by Electrolysis. (P) Petri. (v, 1886).....                                                | 500  |
| Ferro- and Ferrieyanide, Estimations by. (Luckow.) (xi, 1892).....                                                     | 457  |
| Ferrocyanide Compound, New. (Mahla.) (viii, 1889).....                                                                 | 283  |
| Ferrocyanide, Determination of Zinc by. (Moldenhauer.) (x, 1891).....                                                  | 574  |
| Ferrocyanide, Development with Quinol containing. (Hinly.) (ix, 1890).....                                             | 102  |
| Ferrocyanide, Manufacture of. (Readman.) (vii, 1889).....                                                              | 757  |
| Ferrocyanide, Production of. (P) Hetherington and Muspratt. (xiv, 1895).....                                           | 271  |
| Hydrate, Manufacture of. (P) Gabet. (ix, 1890).....                                                                    | 391  |
| Hydrate. See also under Hydrates.                                                                                      |      |
| Hydrogen-Tartrate as Starting Point for Acidimetry and Alkalimetry. (Bornträger.) (xi, 1892).....                      | 776  |
| Hyposulphite of Sodium and Bismuth as Test for. (Pauly.) (vi, 1887).....                                               | 562  |
| In Manures, Determination of. (Dollfuss.) (ii, 1883).....                                                              | 184  |
| In Plants, Humus and Field-Soil. (Berthelot and André.) (vii, 1888).....                                               | 393  |

| Nitrate, in Marshland. (T.R.) (xi, 1892).....                                                                                | 854      |
| Nitrate, Occurrence of Perchlorate in. (Haussermann.) (xiii, 1894).....                                                      | 947      |
| Nitrate. See also under Saltpetre.                                                                                           |          |
| Or Sodium, Manufacture of Carbonates or Bicarbonates of. (P) Bramley. (vi, 1887).....                                        | 41       |
| Perchlorate, Elimination of, from Saltpetre. (Panastovic.) (xiv, 1895).....                                                  | 157      |
| Permanganate, A Test for Cocaine. (Giesel.) (v, 1886).....                                                                   | 335      |
| Permanganate, Action of, on Sodium Thiosulphate. (Lunge and Smith.) (ii, 1884).....                                          | 463      |
| Permanganate, Analysis of. (Lunge.) (iv, 1885).....                                                                          | 613      |
| Permanganate as Reagent for Alkaloids. (Beekurts.) (v, 1886).....                                                            | 510      |
| Permanganate, Behaviour of, with Carbon Bisulphide. (Obach.) (ii, 1883).....                                                 | 425      |
| Permanganate, Combination of Producers of. (T.R.) (x, 1891).....                                                             | 959      |
| Permanganate, Detection of Impurities in Alcohols by. (Cazeneuve.) (viii, 1889).....                                         | 924      |
| Permanganate, Estimation of Arsenious Acid with. (Vaino.) (xiv, 1895).....                                                   | 888      |
| Permanganate, Estimation of Nitrogen by Alkaline. (Wagner.) (ix, 1890).....                                                  | 556      |
| Permanganate, Estimation of Organic Substances by. (Arciarow.) (xi, 1892).....                                               | 464      |
| Permanganate, Estimation of Tannin with. (Gantter.) (viii, 1889).....                                                        | 1015     |
| Permanganate, Formation of Tartaric Acid by Oxidation of Phenol with. (Doebner.) (x, 1891).....                              | 849      |
| Permanganate, Gas-Volumetric Analysis of. (Lunge.) (ix, 1890).....                                                           | 21       |
| Permanganate in Germany. (T.R.) (xii, 1893).....                                                                             | 963      |
| Permanganate, Oxidation by. (Smith.) (vi, 1887).....                                                                         | 260      |
| Permanganate, Oxidation of Fatty Acids with. (Grüssner and Hazura.) (viii, 1889).....                                        | 806      |
| Permanganate, Oxidation of Gelatin with. (Maly.) (viii, 1889).....                                                           | 468      |
| Permanganate, Oxidation of Sodium Thiosulphate by. (Luckow.) (xii, 1893).....                                                | 376      |
| Permanganate, Production of. (P) Brock and Hurter. (xiii, 1894).....                                                         | 394      |
| Permanganate, Reducing Action of Organic Substances contained in Water on. (Zera.) (xiii, 1894).....                         | 427      |
| Permanganate Solution, Tables showing Strength of. (Vanuio.) (ix, 1890).....                                                 | 552      |
| Permanganate Solution, Titrations with. (Lenz.) (iv, 1887).....                                                              | 368      |
| Permanganate, Titration of Manganese by. (iii, 1884).....                                                                    | 115      |
| Persulphate. (Marshall.) (x, 1891).....                                                                                      | 1004     |
| Phosphate as Manure. (Meyer.) (xii, 1894).....                                                                               | 409      |
| Phosphate, Manufacture of, for Manure. (Jay and Dupasquier.) (xiv, 1895).....                                                | 876      |
| Phosphate Soluble in Water, Production of. (P) Precht. (xii, 1893).....                                                      | 354      |
| Platinchloride, Determination of Potash as. (Wintmn.) (xiv, 1895).....                                                       | 919      |
| Platinchloride, Rapid Reduction of. (Bornträger.) (xii, 1893).....                                                           | 782      |
| Production of:                                                                                                               |          |
| (P) Castner. (x, 1891).....                                                                                                  | 777      |
| (P) Cunningham. (vii, 1888).....                                                                                             | 851      |
| (P) Jarvis. (viii, 1889).....                                                                                                | 200      |
| (P) Justice. From Castner. (v, 1886).....                                                                                    | 538      |
| (P) Parker and Robinson. (ix, 1890).....                                                                                     | 742      |
| (P) Wallis. (viii, 1889).....                                                                                                | 801      |
| (P) White. (viii, 1889).....                                                                                                 | 801      |
| Production of, and Apparatus therefor:                                                                                       |          |
| (P) Lake. From Netto. (viii, 1889).....                                                                                      | 122      |
| (P) Netto. (vii, 1888).....                                                                                                  | 851      |
| (P) Thompson and White. (vii, 1888).....                                                                                     | 440      |
| (P) Thowless. (vi, 1887).....                                                                                                | 823      |
| Production of Metallic. (P) Vautin. (xiv, 1895).....                                                                         | 584      |
| Prussiate, German Trade in. (T.R.) (xiii, 1894).....                                                                         | 1111     |
| -Pyrral, Action of Allyl-bromide on. (i, 1882).....                                                                          | 491      |
| -Pyrral, Action of Ethyl chlorocarbonate on. (i, 1882).....                                                                  | 494      |
| -Pyrral, Action of Iodine on. (i, 1882).....                                                                                 | 494      |
| Removal of Iodate from Iodide of. (Morse and Burton.) (vii, 1888).....                                                       | 690      |
| Salicylate, Manufacture of. (P) Marasse. (xii, 1893).....                                                                    | 1055     |
| Salts, Action of Ammonia on. (Girard.) (iv, 1885).....                                                                       | 593      |
| Salts, Adulteration of Chili Saltpetre with. (Bötcher.) (ix, 1890).....                                                      | 67       |
| Salts, Ammonium Chloride in Stassfurt. (Neimke.) (x, 1891).....                                                              | 836      |
| Salts, Cause of Reversion of Phosphoric Acid in Superphosphates containing. (Schucht, Loges, and Emmerling.) (iv, 1885)..... | 538      |

| Rawes' Process for Recovery of Sulphur, Experiments on. (Kemp.) (iv, 1885).....                                        | 144  | Machines, Apparatus for Regulating Flow of Volatile Liquid in. (P) Lightfoot. (xi, 1892).....                       | 896      |
| Reaction in Titrations with Fehling's Solution, The End. (Beckmann.) (vi, 1887).....                                   | 52   | Vessel for Manufacture of Cream, &c. (P) Horner and Hazel. (x, 1891).....                                           | 1020     |
| Influence of Solvent or Medium on Speed of. (Menshutkin.) (ix, 1890).....                                              | 901  | Refrigeration. (Davis.) (vi, 1887).....                                                                             | 252      |
| Relation between Heats of Formation and the Critical Temperatures of. (Prud'homme.) (xii, 1893).....                   | 383  | Application of. (Tate.) (xiv, 1895).....                                                                            | 110      |
| Reactions for Identifying Narcotic Extracts. (Leuken.) (v, 1886).....                                                  | 335  | Artificial, from Central Stations. (Branson.) (xiii, 1894).....                                                     | 787      |
| Of Starch and Gum, New Colour. (Ihl.) (vi, 1887).....                                                                  | 306  | Refrigerator, High Pressure. (P) Windhausen and Haurie. (ii, 1883).....                                             | 125      |
| Reagent for Benzoic Acid. (Hager.) (v, 1886).....                                                                      | 303  | Refrigerators, Apparatus for Thawing Pipes of Air. (P) Linde. (ix, 1890).....                                       | 594      |
| For Detecting Acidity of Weak Acids. (Engel.) (v, 1886).....                                                           | 392  | Refuse, Analysis of Animal. (Macadam.) (vii, 1888).....                                                             | 84       |
| For Disinfecting, &c. (P) Wollheim. (viii, 1889).....                                                                  | 564  | Apparatus for Burning. (P) Newton. From The Pinhoe Patent Refuse Destructor Co. (xiv, 1895).....                    | 767      |
| For Free Acid, Congo-Red as. (Schulz.) (v, 1886).....                                                                  | 544  | Apparatus for Disinfecting House. (P) Boul. From Salberg. (xiii, 1894).....                                         | 832      |
| For Showing Presence of a Hydroxyl Group. (Landwehr.) (vi, 1887).....                                                  | 226  | Apparatus for Treating. (P) Warner. (ix, 1890).....                                                                 | 207      |
| Reagents for Analyses of Combinations of Copper Oxide with Sugar, &c. (Guignet.) (viii, 1889).....                     | 925  | Apparatus for Treating Town-. (P) Cunliffe and Barlow. (xi, 1892).....                                              | 450      |
| For Detecting Oxygen. (Wurster.) (vi, 1887).....                                                                       | 304  | (P) Lacey. (xiv, 1895).....                                                                                         | 592      |
| Impurities in. (Krauch.) (vii, 1888).....                                                                              | 645  | (P) Smithson. (xiii, 1894).....                                                                                     | 271      |
| Manufacture of Sanitary. (P) Kingzett. (x, 1891).....                                                                  | 156  | Apparatus for Treatment of Offensive. (P) Alliot. (xiv, 1895).....                                                  | 214      |
| Strength of. (Blochmann.) (ix, 1890).....                                                                              | 550  | From Olive-Oil Factories. (Sestini and Tobler.) (viii, 1889).....                                                   | 290      |
| Testing of. (König.) (viii, 1889).....                                                                                 | 215  | Furnace and Apparatus for Treating Town-. (P) Healey and Thwaite. (iv, 1885).....                                   | 545      |
| Testing Purity of Commercial. (Nencki.) (viii, 1889).....                                                              | 922  | Furnaces for Consuming. (P) Baker. (xiv, 1895).....                                                                 | 644      |
| Realgar, Decomposition of, by Caustic Potash. (Kalmann and Glaser.) (vii, 1888).....                                   | 870  | Furnaces for Destruction of Town-. (P) Willoughby. (xiv, 1895).....                                                 | 767, 767 |
| Receiver for Fractional Distillation <i>in Vacuo</i> . (Boyen.) (vii, 1888).....                                       | 522  | Furnaces for Treating Towns. (P) Ogden. (vi, 1887).....                                                             | 672      |
| For Volatile Liquids. (P) Beach. (viii, 1889).....                                                                     | 1009 | Manufacture of Gas from Towns. (P) Scudder. (x, 1891).....                                                          | 845      |
| Receivers for Ethyl Chloride, &c. (P) Mills. From Gilhard and others. (xii, 1893).....                                 | 948  | Treatment and Utilisation of: (P) Epstein. (iii, 1884).....                                                         | 424      |
| Receptacles for Sewage, and Disinfecting same. (P) Stoffert. (xiii, 1894).....                                         | 970  | (P) Jones. (xiv, 1895).....                                                                                         | 675      |
| Reception and Conversazione, Thirteenth Annual Meeting. (xiii, 1894).....                                              | 701  | Treatment of. (P) Bobrowski. (viii, 1889).....                                                                      | 1000     |
| And Conversazione. (xiv, 1895).....                                                                                    | 725  | Treatment of, in Podewil's Fecal Extract Factory. (xiii, 1894).....                                                 | 412      |
| And Smoking Concert. (xi, 1882).....                                                                                   | 578  | Treatment of Town-. (P) Sayer. (xiii, 1894).....                                                                    | 899      |
| Rectification, Process of. (P) Wright. (v, 1886).....                                                                  | 331  | United States' Legislation <i>re</i> Discharge of. (T.R.) (xiii, 1894).....                                         | 1233     |
| Rectifying Apparatus. (P) Pitt. From Savalle. (xi, 1892).....                                                          | 257  | Utilisation of Town, at Rochdale. (Brookman.) (xiv, 1895).....                                                      | 310      |
| Apparatus for Alcohols. (P) Perrier. (xi, 1892).....                                                                   | 832  | Waters of Chemical Works. (Wallace.) (iv, 1885).....                                                                | 714      |
| Red Discharge on Vat Blue. (Secheur.) (iv, 1885).....                                                                  | 342  | <i>See also under Residues and Wastes.</i>                                                                          |          |
| Red Liquor, Examination of. (Williams.) (v, 1886).....                                                                 | 73   | Regeneration of Gas-purifying Material, Influence of Cyanogen on. (Burschall.) (xii, 1894).....                     | 138      |
| Red Tints, Production of, on Fibre. (P) Imray. From The Farbwerke vormals Meister, Lucius and Brünig. (xiv, 1895)..... | 803  | Regensburg, Meeting of Representatives of Bavarian Chemical Industries at, August 1892. (xii, 1893).....            | 539      |
| Red-Lead and Peroxide of Lead. (Lowe.) (viii, 1889).....                                                               | 468  | Registering Apparatus for Liquids. (P) Bruce. (xiv, 1895).....                                                      | 409      |
| Apparatus for Manufacture of. (P) Gregg. (i, 1882).....                                                                | 182  | Regulations concerning Export of Medicinal Tinctures. (T.R.) (viii, 1889).....                                      | 655      |
| Composition and Uses of. (Fritling.) (viii, 1889).....                                                                 | 203  | For Withdrawal of Alcohol from Bond, for Scientific Purposes, or for Use of United States. (T.R.) (viii, 1889)..... | 485      |
| Manufacture of: (P) Kilpatrick. (xiii, 1894).....                                                                      | 158  | Regulator, A Thermo. (Kahibaum.) (vi, 1887).....                                                                    | 501      |
| (P) Larrony. (x, 1891).....                                                                                            | 374  | Adjustable Gas Consumption. (P) Flurschm. (ii, 1883).....                                                           | 163      |
| Testing. (Krenel.) (viii, 1889).....                                                                                   | 220  | Automatic Pressure. (P) Bechem. (i, 1882).....                                                                      | 312      |
| Working Lead Fume into Litharge and. (P) Lewis. (ii, 1883).....                                                        | 284  | For Controlling Electric Lamps. (P) Medland. (vi, 1887).....                                                        | 299      |
